

and other primacy agencies voluntarily provide historical compliance monitoring data for community water systems (CWSs) and non-transient non-community water systems (NTNCWSs) to the Agency. The Agency is requesting contaminant occurrence data and treatment technique data collected from 2006 to 2012 for all regulated chemical, radiological and microbiological contaminants as well as data from the Ground Water Rule (GWR), Surface Water Treatment Rules (SWTRs), Long Term 1 and 2 Enhanced Surface Water Treatment Rules (LT1 and LT2) and Interim Enhanced Surface Water Treatment Rule (IESWTR), Stage 1 and 2 Disinfectants and Disinfection Byproducts Rules (DBPRs) and Filter Backwash Recycling Rule (FBRR). This collection request is a renewal of the current ICR (ICR No. 2231.01) with the addition of requesting treatment technique information.

The compliance monitoring records in this information collection (including all results for analytical detections and non-detections) and the treatment technique information (e.g., sanitary survey and corrective action information) will provide the data needed to conduct statistical estimates of national occurrence for regulated contaminants and will assist in the evaluation of regulation effectiveness. These national occurrence estimates and treatment technique information will support the SDWA section 1412(b)(9) mandate, which requires the Agency to review the existing NPDWRs and determine whether revisions are appropriate. In addition, SDWA section 1445(g) requires the Agency to maintain a national drinking water contaminant occurrence database (i.e., the National Contaminant Occurrence Data (NCOD)) using occurrence data for both regulated and unregulated contaminants in public water systems (PWSs). This data collection will provide new occurrence data on regulated contaminants to maintain the NCOD.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 13.5 hours per State. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any

previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: State drinking water primacy agencies.

Estimated Number of Respondents: 56.

Frequency of Response: Once.

Estimated Total Annual Hour Burden: 756.

Estimated Total Annual Cost: \$37,922, this includes \$0 annualized capital or O&M costs.

Changes in the Estimates: There is an increase of 75 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase reflects the slight modification in the scope (i.e., to request additional data for several rules such as the GWR, SWTRs, DBPRs and FBRR).

Title: NESHAP for Printing and Publishing Industry (Renewal).

ICR Numbers: EPA ICR Number 1739.06, OMB Control Number 2060-0335.

ICR Status: This ICR is scheduled to expire on March 31, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards of Hazardous Air Pollutants (NESHAP) for Printing and Publishing Industry were proposed on March 14, 1995 (60 FR 13664), promulgated on May 30, 1996 (61 FR 27131), and amended on May 24, 2006 (71 FR 29792). These standards apply to the following facilities in 40 CFR subpart KK: Publication rotogravure, product and packaging rotogravure, and wide-web flexographic printing presses at major sources. The effective date was May 30, 1999, for sources existing on May 30, 1996. For new sources or reconstructed sources after May 30, 1996, the effective date of startup is May 30, 1996, whichever is later.

Owners and operators of a new and existing area source are subject to the General Provision (40 CFR part 63, subpart A). In general, all NESHAP standards require initial notifications, performance tests plans, and periodic reports by the owners/operators of the affected facilities. For the facilities installing continuous monitoring systems (CMS), there are performance test and maintenance reports.

They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance and are required of all

affected facilities subject to NESHAP. Semiannual summary reports are also required.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least five years following the collection of such measurements, maintenance reports, and records.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart KK, as authorized in sections 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA regulations listed in 40 CFR part 9 and 48 CFR chapter 15, are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information estimated to average 95 hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose, and provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Printing and publishing industry.

Estimated Number of Respondents: 352.

Frequency of Response: Initially, annually, and semiannually.

Estimated Total Annual Hour Burden: 58,215.

Estimated Total Annual Cost: \$5,888,997, which includes \$5,474,997 in labor costs, \$0 in capital/startup costs, and \$414,000 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is a change in this ICR as compared to the previous one. Based on our discussions with the printing and publishing industry representatives, the printing industry in particular, will be experiencing essentially a flat production in the coming years with no new facilities anticipated. This ICR also reflects the most recent hourly labor rates which, takes into account the managerial, technical and clerical burdens as compared to the previous ICR. Corrections include a minor mathematical error and recalculation of the number of responses.

There is a small increase in the capital/startup and operations and maintenance (O&M) costs from the previous ICR, which is due to rounding-up the number of affective respondents.

Dated: February 1, 2010.

Director, Collection Strategies Division.
