Abstract: The authority for EPA's oil pollution prevention requirements is derived from section 311(j)(1)(C) of the Clean Water Act, as amended by the Oil Pollution Act of 1990. EPA's regulation is codified at 40 CFR part 112. Although the owner or operator is the primary data user, EPA may also require the owner or operator to submit data to the Agency in certain situations to ensure facilities comply with the SPCC regulation and to help allocate response resources. State and local governments may use the data, which are not

generally available elsewhere and can assist local emergency preparedness planning efforts.

Form numbers: None.

Respondents/affected entities:

Owners or operators of facilities required to have Spill Prevention, Control, and Countermeasure (SPCC) plans under the Oil Pollution Prevention regulation (40 CFR part 112) and which, because of their location, could reasonably be expected to cause substantial harm to the environment.

Respondent's obligation to respond: Mandatory, pursuant to 40 CFR 112.3(e).

Estimated number of respondents: 549,362 (total).

Frequency of response: Facilities must prepare and implement an SPCC Plan before beginning operations and review, evaluate, and update the SPCC Plan every five years. In the event of certain discharges of oil into navigable waters, a facility owner or operator must submit certain information to the Regional Administrator within 60 days.

Total estimated burden: 6,625,194 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$893,604,697 (per year), which includes \$208,724,033 annualized capital or operation & maintenance (O&M) costs.

Changes in the estimates: There is an increase of 315,671 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to changes in the universe of regulated facilities after accounting for changes in the numbers and types of existing and newly regulated facilities in the new ICR period, as well as small adjustments in unit burden estimates for activities associated with SPCC Plan amendments. While the universe of regulated facilities decreases by less than one percent during the new ICR period; (549,362 vs. 549,785 respondents), a slightly higher proportion of this universe consists of regulated facilities with a relatively greater unit burden.

Abstract: The New Source Performance Standards (NSPS) for the Graphic Arts Industry (40 CFR part 60, subpart QQ) were proposed on October 28, 1980; promulgated on November 8, 1982; and most recently amended on April 9, 2004. These regulations apply to each publication rotogravure printing press (not including proof presses) commencing either construction, or modification, or reconstruction after the date of proposal. New facilities include those that commenced either construction, or modification, or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart QQ.

Form numbers: None.

Respondents/affected entities: Owners or operators of graphic arts facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart QQ).

Estimated number of respondents: 6 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 470 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$56,200 (per year), which includes \$0 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is a decrease of 1,590 hours in the total estimated respondent burden compared

with the ICR currently approved by OMB. This decrease in burden is an adjustment based on a review of sources listed on the Enforcement Compliance History Online (ECHO) database and consultations with industry indicating that the estimated number of sources in this renewal should be lowered. The ECHO sources listed included 6 active respondents subject to subpart QQ. Additionally, consultations with Gravure Association of Americas identified two companies with operations using the publication rotogravure printing process, both of which owned facilities included in the ECHO list. Based on consultations, EPA's ECHO database, and comparisons with previous ICRs, the industry is currently declining. As a result, it is assumed no new respondents will be added over the next three years. Labor costs have also been adjusted to correct an error in the previous ICR's calculations resulting from managerial and technical labor rates being transposed and applied incorrectly to each other's labor hours.

Director, Regulatory Support Division.
