

in the Plan. The TMDL Technical Assessment Report is included as an appendix to the Plan.

The Services formally initiated an environmental review of the project through a Notice of Intent to prepare a Statement in the Federal Register on February 9, 1999 (64 FR 6325). This notice also announced a 30-day public scoping period, during which other agencies, tribes, and the public were invited to provide comments and suggestions regarding issues and alternatives to be included in the Statement. A draft Statement was subsequently produced and made available for a 62-day public review period on October 22, 1999 (64 FR 57630). Comments received on the draft Statement and responses to those comments are included in the final Statement.

The final Statement fully analyzes a No Action alternative, the Proposed Action, a Forests and Fish Report Alternative, and a Modified Northwest Forest Plan Alternative. Under the No Action Alternative, incidental take permits would not be issued and Simpson would continue a forest management program which avoids take of federally listed species. Under the Forests and Fish Report Alternative incidental take permits would not be issued and Simpson would conduct forest management according to the proposed revisions to the Washington State Forest Practices Act, and avoid take of federally listed species. Under the Proposed Action, the Services would issue Incidental Take Permits and Simpson would implement their proposed Plan on 261,575 acres of Simpson's Washington timberlands. Under a Modified Northwest Forest Plan Alternative, the Services would issue Incidental Take Permits, and Simpson would implement a Plan with riparian conservation measures providing protective buffers approximately mid-way between the buffers provided by the Northwest Forest Plan and the Proposed Action. Current Washington Forest Practices would be applied where Northwest Forest Plan guidelines are not available.
