

A variety of agencies sponsor data-collection components on NHANES. To keep burden down, NCHS cycles in and out various components. The 2015–2016 NHANES physical examination includes the following components: Oral glucose tolerance test (ages 12 and older), anthropometry (all ages), 24-hour dietary recall (all ages), physician’s examination (all ages, blood pressure is collected here), oral health examination (ages 1 and older), hearing (ages 20–59), dual X-ray absorptiometry (total body composition ages 6–59 and osteoporosis, vertebral fractures and aortic calcification ages 40 and older). The oral health examination includes the collection of an oral human papilloma virus (HPV) specimen on those ages 14–69.

While at the examination center additional interview questions are asked (6 and older), and a second 24-hour dietary recall (all ages) is scheduled to be conducted by phone 3–10 days later.

Beginning in 2015, collection of four additional oral HPV specimens will occur in the home at 6, 12, 18 and 24 months after the first collection. Specimens will be returned via mail.

The bio-specimens collected for laboratory tests include urine, blood, vaginal and penile swabs, oral rinses (HPV) and household water collection. Serum, plasma and urine specimens are stored for future testing if the participant consents.

The following major examination or laboratory items, that had been included in the 2013–2014 NHANES, were cycled out for NHANES 2015–2016: Physical activity monitor, taste and smell component and upper body muscle strength (grip test).

Most sections of the NHANES interviews provide self-reported information to be used either in concert with specific examination or laboratory content, as independent prevalence estimates, or as covariates in statistical

analysis (e.g., socio-demographic characteristics). Some examples include alcohol, drug, and tobacco use, sexual behavior, prescription and aspirin use, and indicators of oral, bone, reproductive, and mental health. Several interview components support the nutrition monitoring objective of NHANES, including questions about food security and nutrition program participation, dietary supplement use, and weight history/self-image/related behavior.

NHANES data users include the U.S. Congress; numerous Federal agencies such as other branches of the Centers for Disease Control and Prevention, the National Institutes of Health, and the United States Department of Agriculture; private groups such as the American Heart Association; schools of public health; and private businesses. There is no cost to respondents other than their time. The total estimated annualized burden hours are 43,525.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hrs)
Individuals in households .....	NHANES Questionnaire .....	14,410	1	2.5
Individuals in households .....	Special Studies .....	2,500	1	3

**Proposed Data Collections Submitted for Public Comment and Recommendations**

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404–639–7570 or send comments to Leroy A. Richardson, 1600

Clifton Road, MS–D74, Atlanta, GA 30333 or send an email to [omb@cdc.gov](mailto:omb@cdc.gov).

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train

personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. Written comments should be received within 60 days of this notice.

**Proposed Project**

Health Insurance Plans Research Study—New—Office of Health System Collaboration, Office of the Associate Director for Policy, Office of the Director, Centers for Disease Control and Prevention (CDC).

*Background and Brief Description*

The Health Insurance Plans Research Study will uniquely examine the prevalence, characteristics, and differences of prevention and wellness programs offered by health insurance plans in this critical era of healthcare reform. There are no known studies that have addressed the prevalence of prevention and wellness programs across health plans or explored the granular details of these programs as this study is intended to do. Not conducting this study would be one less step toward increasing healthy years of life.

Furthermore, the Health Insurance Plans Research Study will address the priorities and goals of the CDC Office of the Associate Director for Policy, Office of Health System Collaboration: (a) Identify and catalyze policy opportunities such as the Affordable Care Act to enhance healthcare transformation, (b) advance CDC’s public health-healthcare strategy to improve population health, (c) strengthen strategic partnerships with healthcare systems and payers, federal and non-federal, and (d) fully leverage performance measures as a tool to improve the health of individuals across health systems and payers.

The CDC Office of the Associate Director for Policy intends to request that the Office of Management and Budget (OMB) approve a new collection of information under the Paperwork Reduction Act for three years. This data collection will occur once, and respondents will be surveyed once.

A sample of approximately 150 commercial health insurance plans in the United States that differ by size and geography, in the 50 states and the District of Columbia, will be selected to complete a web-based survey, the *Prevention and Wellness Assessment Survey*. The survey will be completed electronically; the burden should be minimal as compared to a paper-and-pencil survey. Information about the survey and instructions will be provided to health plan points of contact in advance and will also be available on the Web site, eliminating any interactions between the respondent and the project team, unless a respondent(s) has questions or concerns during completion of the survey.

The survey will take approximately 30 minutes to complete per respondent for a total estimated burden of 75 hours. Some burden associated with coordinating the time and identifying a person to take the survey will be imposed on key health plan contacts (e.g., medical directors, nurse directors, or other healthcare professional). The burden associated with this activity is estimated at 30 minutes per key health plan contact for a maximum of one key contact per health plan (1 key contact × 150 health plans = 150 key contacts), resulting in a total burden of 75 hours. In addition, administrative support staff at select health plans may assist with coordinating communications between key health plan points of contact and AHIP; the estimated burden is 30 minutes per health plan, resulting in a total burden of 75 hours.

Following the analysis of survey data, the project team will conduct one-hour telephone interviews with no more than nine health plans (1 hour × 9 health plans) to gain a better understanding of lessons learned and best practices associated with the design and implementation of prevention and wellness programs by commercial health insurance plans. The project team will use this information to build upon the knowledge gained through the survey. For example, there may be differences in how health plans structure prevention and wellness programs for different employer accounts based on employer requests. The estimated burden is 1 hour per health plan, resulting in a total burden of 9 hours.

As shown in the burden table, the total burden calculation in hours for key

health plan points of contact, and health plan respondents (e.g., physicians, nurses, other healthcare professionals) and administrative support staff for this data collection is 234 hours.

Best practices in outreach will be utilized to maximize survey response rates. Key health plan contacts at non-responding health plans will receive follow up by telephone and one-to-one assistance will be provided if needed.

The results of this study are of great interest not only to the CDC Office of the Associate Director for Policy but to other CDC Centers, Institutes, and Offices; and other federal agencies and partners such as the Health Resources and Services Administration (HRSA), the members of the CDC Advisory Committee to the Director, and the CDC Public Health-Health Care Collaboration Workgroup (federal, state, and local public health; public and private organizations; healthcare providers; professional membership associations; and academia representation). The government intends to accomplish the following as a result of this data collection: (a) Identify high priority opportunities for public health and healthcare collaboration, (b) inform a public health-healthcare strategic agenda, (c) improve the use of clinical preventive services, and (d) improve capacity of healthcare systems to incorporate public health practices and principles. At the conclusion of this study, a formal report, two issue briefs, and potentially a manuscript for publication will be produced.

CDC is requesting approval for approximately 234 burden hours annually. There are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

**Proposed Data Collections Submitted  
 for Public Comment and  
 Recommendations**

The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. To request more information on the below proposed project or to obtain a copy of the information collection plan and instruments, call 404-639-7570 or send comments to Leroy A. Richardson, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an email to *omb@cdc.gov*.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget (OMB) approval. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected (d) ways to

minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. Written comments should be received within 60 days of this notice.

**Proposed Project**

National Vital Statistics Report Forms (OMB No. 0920-0213, expires 04/30/2015)—Extension—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

*Background and Brief Description*

The compilation of national vital statistics dates back to the beginning of the 20th century and has been conducted since 1960 by the Division of Vital Statistics of the National Center for Health Statistics, CDC. The collection of the data is authorized by 42 U.S.C. 242k. This submission requests approval to collect the monthly and annually summary statistics for three years.

The Monthly Vital Statistics Report forms provide counts of monthly occurrences of births, deaths, infant deaths, marriages, and divorces. Similar

data have been published since 1937 and are the sole source of these data at the National level. The data are used by the Department of Health and Human Services and by other government, academic, and private research and commercial organizations in tracking changes in trends of vital events. Respondents for the Monthly Vital Statistics Reports Form are registration officials in each State and Territory, the District of Columbia, and New York City. In addition, local (county) officials in New Mexico who record marriages occurring and divorces and annulments granted in each county of New Mexico will use this form. This form is also designed to collect counts of monthly occurrences of births, deaths, infant deaths, marriages, and divorces immediately following the month of occurrence.

The Annual Vital Statistics Occurrence Report Form collects final annual counts of marriages and divorces by month for the United States and for each State. The statistical counts requested on this form differ from provisional estimates obtained on the Monthly Vital Statistics Report Form in that they represent complete counts of marriages, divorces, and annulments occurring during the months of the prior year. These final counts are usually available from State or county officials about eight months after the end of the data year. The data are widely used by government, academic, private research, and commercial organizations in tracking changes in trends of family formation and dissolution. Respondents for the Annual Vital Statistics Occurrence Report Form are registration officials in each State and Territory, the District of Columbia, and New York City.

There are no costs to respondents other than their time. The total estimated annualized burden hours are 211.
