#### SUPPLEMENTARY INFORMATION:

##### I. Background

The Office of Workers' Compensation Programs administers the Longshore and Harbor Workers' Compensation Act. The Act provides benefits to workers injured in maritime employment on the navigable waters of the United States and adjoining area customarily used by an employee in loading, unloading, repairing, or building a vessel. The LS–202 is used by employers initially to report injuries that have occurred which are covered under the Longshore Act and its related statutes. The LS–210 is used to report additional periods of lost time from work. This information collection is currently approved for use through January 31, 2014.

##### II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,

e.g., permitting electronic submissions of responses.

## II. Current Actions

The Department of Labor seeks the extension of approval of this information collection in order to ensure that employers are complying with the reporting requirements of the Act and to ensure that injured claimants
