AGENCY: United States Section, International Boundary and Water Commission, United States and Mexico.

ACTION: Notice of Availability of the Final Environmental Assessment (EA) and Finding of No Significant Impact (FONSI).

A notice of finding of no significant impact dated April 2, 2009, provided a thirty (30) day comment period before making the finding final. The Notice was published in the **Federal Register** on April 2, 2009 (**Federal Register** Notice, Vol. 74, No. 62, Page 14999). **FOR FURTHER INFORMATION CONTACT:** Daniel Borunda, Environmental Protection Specialist; Environmental Management Division; United States Section, International Boundary and Water Commission; 4171 N. Background: The USIBWC operates and maintains the Presidio Flood Control Project (FCP) located along the Rio Grande within the city of Presidio, Texas. The FCP extends approximately 15.2 miles, from Haciendita, upstream of the Rio Conchos confluence, and ending downstream of Presidio near Brito Creek. In September and October 2008, the Presidio FCP levees sustained major flood damage from overtopping, under-seepage, and erosion. The USIBWC intends to repair a 3000-foot section of levee near Station 7+000 that is susceptible to under-seepage and possible levee failure. The USIBWC will remediate the levee failure by constructing a slurry-trench cut-off wall.
