unforeseen circumstances), however, could necessitate modification to the mission objectives and timing. Such modifications could result in the need to launch one mission in 2003 and a second mission at a later date, or not at all. Depending upon the significance of any new information and whether any changes in the project are substantial, NASA will consider preparing additional environmental documentation in accordance with CEQ and NASA procedures.

For the MER–2003 missions, the potentially affected environment for normal launches includes the area at and in the vicinity of the launch site, CCAFS in Florida. The environmental impacts of normal launches of the two missions for the proposed action would be associated principally with the exhaust emissions from each of the Delta II launch vehicles. These effects would include: (1) Short-term impacts on air quality within the exhaust cloud and near the launch pads and (2) the potential for acidic deposition on the vegetation and surface water bodies at and near the launch complex, particularly if rain occurs shortly after launch.

Potential launch accidents could result in the release of some of the radioactive material on board the rover. Each rover would employ two instruments that use small quantities of cobalt-57 (not exceeding 350 millicuries) and curium-244 (not exceeding 50 millicuries) as instrument sources. Each rover would have up to 11 RHUs that use plutonium dioxide to provide heat to the electronics and batteries on board the rover. The radioisotope inventory of 11 RHUs would total approximately 365 curies of plutonium.

The U.S. Department of Energy (DOE), in cooperation with NASA, has performed a risk assessment of potential accidents for the MER–2003 project. This assessment used a methodology refined through applications to the Galileo, Mars Pathfinder, and Cassini missions and incorporates results of safety tests on the RHUs and an evaluation of the January 17, 1997, Delta II accident at CCAFS. DOE's risk assessment for this project indicates that in the event of a launch accident the expected impacts of released radioactive material at and in the vicinity of the launch area, and on a global basis, would be small.

FEIS Review Copies

The FEIS may be reviewed during normal business hours at the following locations:

- (a) NASA Headquarters, Library, Room 1J20, 300 E Street, SW., Washington, DC 20546.
- (b) Spaceport U.S.A., Room 2001, John F. Kennedy Space Center, FL 32899. Please call Lisa Fowler at 321–867–2201 so that arrangements can be made.
- (c) Jet Propulsion Laboratory, Visitors Lobby, Building 249, 4800 Oak Grove Drive, Pasadena, CA 91109 (818–354– 5179).

In addition, the FEIS may be examined at the following NASA Centers by contacting the Freedom of Information Act Office at the respective Center:

- (d) NASA, Ames Research Center, Moffett Field, CA 94035 (650–604– 1181).
- (e) NASA, Dryden Flight Research Center, P.O. Box 273, Edwards, CA 93523 (661–276–2704).
- (f) NASA, Glenn Research Center at Lewis Field, 21000 Brookpark Road, Cleveland, OH 44135 (216–433–2755).
- (g) NASA, Goddard Space Flight Center, Greenbelt Road, Greenbelt, MD 20771 (301–286–0730).
- (h) NASA, Johnson Space Center, Houston, TX 77058 (281–483–8612).
- (i) NASA, Langley Research Center, Hampton, VA 23681 (757–864–2497).
- (j) NASA, Marshall Space Flight Center, Huntsville, AL 35812 (256–544– 2030).
- (k) NASA, Stennis Space Center, MS 39529 (228–688–2164).

Limited hard copies of the FEIS are available, on a first request basis, by contacting David Lavery, Office of Space Science, Mail Code SM, NASA Headquarters, Washington, DC 20546–0001, telephone 202–358–4800, or electronic mail marsnepa@hq.nasa.gov.

Electronic Access

The FEIS is also available in Acrobat® format at http://spacescience.nasa.gov/admin/pubs/mereis/index.htm.

Copies of the Record of Decision

Copies of the record of decision, when issued, may be obtained upon written request to David Lavery, Office of Space Science, Mail Code SM, NASA Headquarters, Washington, DC 20546–0001.

Dated: December 5, 2002.

Jeffrey E. Sutton,

Assistant Administrator for Management Systems.

NATIONAL TRANSPORTATION SAFETY BOARD

Sunshine Act Meeting

TIME AND PLACE: 9:30 a.m., Tuesday, December 17, 2002.

PLACE: NTSB Conference Center, 429 L'Enfant Plaza SW., Washington, DC 20594.

STATUS: The two items are Open to the Public.

MATTERS TO BE CONSIDERED:

7454A—Marine Accident Report— Collision Between the U.S. Coast Guard Patrol Boat *CG242513* and the U.S. Small Passenger Vessel *Bayside Blaster*, Biscayne Bay, Miami, Florida, January 12, 2002.

7513—Highway Accident Brief— Motorcoach run-off-the-road, near Canon City, Colorado, on December 21, 1999.

New Media Contact: Telephone: (202) 314–6100.

Individuals requesting specific accommodations should contact Ms. Carolyn Dargan at (202) 314–6305 by Friday, December 13, 2002.

FOR MORE INFORMATION CONTACT: Vicky D'Onofrio, (202) 314–6410.

Dated: December 6, 2002.

Vicky D'Onofrio,

 $Federal\ Register\ Liaison\ Of ficer.$

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-318]

Calvert Cliffs Nuclear Power Plant, Inc., Calvert Cliffs Nuclear Power Plant, Unit No. 2, Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory
Commission (NRC) is considering
issuance of an exemption from Title 10
of the Code of Federal Regulations (10
CFR) part 50.44, 46 and Appendix K for
Facility Operating License No. DPR-69,
issued to Calvert Cliffs Nuclear Power
Plant, Inc. (the licensee), for operation
of the Calvert Cliffs Nuclear Power
Plant, Unit No. 2 (Calvert Cliffs), located
in Calvert County, Maryland. Therefore,
as required by 10 CFR 51.21, the NRC
is issuing this environmental
assessment and finding of no significant
impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action, as described in the licensee's application for exemption
