

10. US 87 Expansion Project from east of the US 385 Interchange near Hartley, to FM 2589 west of Dumas, in Moore and Hartley Counties, Texas. The proposed project includes expanding the roadway from the current two-lane with super-two passing lanes configuration to a four-lane divided highway. This project is approximately 20 miles long. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Final Environmental Assessment (EA), the Finding of No Significant Impact (FONSI) issued on July 29, 2021, and other documents in the TxDOT project file. The EA, FONSI, and other documents in the TxDOT project file are available by contacting the TxDOT Amarillo District Office at 5715 Canyon Drive, Amarillo, Texas 79110; telephone: (806) 356-3256.

11. US 281 from SH 186/FM 1017 to FM 3066, in Hidalgo and Brooks Counties, Texas. The purpose of the project is to upgrade US 281 to interstate standards and improve mobility to meet projected traffic demand. The proposed project would involve widening and reconstruction of the main lanes, as well as addition of frontage roads and overpasses throughout portions of the project area, for approximately 41.9 miles. The actions by TxDOT and Federal agencies and the laws under which such actions were taken are described in the Environmental Assessment (EA), the Finding of No Significant Impact (FONSI) issued on September 13, 2021 and other documents in the TxDOT project file. The EA, FONSI, and other documents in the TxDOT project file are available by contacting the TxDOT Pharr District Office at 600 W Interstate 2, Pharr, Texas 78577; telephone: (956) 702-6100.

Authority: 23 U.S.C. 139(l)(1).

BILLING CODE 4910-22-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA-2021-0012]

Agency Information Collection Activities; Notice and Request for Comment; Fatal Crash Seat Belt Use Reporting and Awareness

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for comments on a request for approval of a new information collection.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) invites public comments about our intention to request approval from the Office of Management and Budget (OMB) for a

new information collection. Before a Federal agency can collect certain information from the public, it must receive approval from OMB. Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatements of previously approved collections. This document describes a collection of information for which NHTSA intends to seek OMB approval on Fatal Crash Seat Belt Use Reporting and Awareness.

DATES: Comments must be submitted on or before November 29, 2021.

ADDRESSES: You may submit comments identified by the Docket No. NHTSA-2021-0012 using any of the following methods:

- *Electronic submissions:* Go to the Federal eRulemaking Portal at <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- *Fax:* (202) 493-2251.
- *Mail or Hand Delivery:* Docket Management, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12-140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays. To be sure someone is there to help you, please call (202) 366-9322 before coming.

Instructions: All submissions must include the agency name and docket number for this notice. Note that all comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. Please see the Privacy Act heading below.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477-78) or you may visit <https://www.transportation.gov/privacy>.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov> or the street address listed above. Follow the online instructions for accessing the dockets via internet.

FOR FURTHER INFORMATION CONTACT: For additional information or access to background documents, contact Jordan A. Blenner, JD, Ph.D., Office of Behavioral Safety Research (NPD-320),

(202) 366-9982, National Highway Traffic Safety Administration, W46-470, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), before an agency submits a proposed collection of information to OMB for approval, it must publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulation (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) how to enhance the quality, utility, and clarity of the information to be collected; and (d) how to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses. In compliance with these requirements, NHTSA asks for public comments on the following proposed collection of information for which the agency is seeking approval from OMB.

Title: Fatal Crash Seat Belt Use Reporting and Awareness.

OMB Control Number: New.

Form Numbers: NHTSA Forms 1599, 1600, 1601, and 1604.

Type of Request: Approval of a new information collection.

Type of Review Requested: Regular.

Requested Expiration Date of Approval: 3 years from date of approval.

Summary of the Collection of Information: The National Highway Traffic Safety Administration (NHTSA) of the U.S. Department of Transportation is seeking approval to collect information from 1,500 participants from two seat belt user groups, 750 who are full-time and 750 who are occasional or non-users, for a one-time voluntary experiment to understand whether the inclusion of seat belt status in a fatal crash news report could affect seat belt use. NHTSA

will contact a sample of 20,850 potential participants from a marketing research firm's panel with an invitation email and screening questions to identify adult volunteers who regularly drive a passenger vehicle. Recruiting participants for the experiment has an estimated burden of 348 hours for the invitation email and 70 hours for the screening questions. (An estimated 20% of the invited potential participants will be interested in participating in the study and will complete the screener form, *i.e.*, 4,170 potential participants.) An estimated 1,668 potential participants will read the consent form with an estimated burden of 139 hours. The 1,500 participants will complete the experiment with an estimated burden of 500 hours. The experiment involves a 40-question online survey that participants will complete in their own homes using their personal computers. Participants will read one of three fictitious news reports of crashes (some of which involve fatalities) to gauge whether including seat belt use in news reports has the potential to increase belt use by occasional and non-seat belt users. After reading the news report, participants will report their recollection of belt use in the news report they read, self-reported seat belt use, intentions to use belts, attitudes about seat belts, and demographic information. The total estimated burden associated with reporting is 1,057 hours. The collection does not involve recordkeeping or disclosure. An approved Institutional Review Board (IRB), Advarra, has reviewed the study and determined that the research project is exempt from IRB oversight. NHTSA will summarize the results of the collection using aggregate statistics in a final report to be distributed to NHTSA program and regional offices, State Highway Safety Offices, and other traffic safety stakeholders. This collection will inform the development of countermeasures, particularly in the areas of communications and outreach, for increasing seat belt use and reducing fatalities and injuries associated with the lack of seat belt use.

Description of the Need for the Information and Proposed Use of the Information: NHTSA was established to reduce deaths, injuries, and economic losses resulting from motor vehicle crashes on the Nation's highways. As part of this statutory mandate, NHTSA is authorized to conduct research for the development of traffic safety programs. Title 23, United States Code, Section 403 gives the Secretary of Transportation (NHTSA by delegation) authorization to use funds appropriated

to conduct research and development activities, including demonstration projects and the collection and analysis of highway and motor vehicle safety data and related information, with respect to all aspects of highway and traffic safety systems and conditions relating to vehicle, highway, driver, passenger, motorcyclist, bicyclist, and pedestrian characteristics; accident causation and investigations; and human behavioral factors and their effect on highway and traffic safety.

In 2018, 22,697 occupants of passenger vehicles (passenger cars, pickup trucks, vans, and SUVs) died in motor vehicle crashes in the United States. Of those killed where restraint status was known, 47% were unrestrained at the time of the fatal crash. NHTSA estimates that seat belts saved the lives of 14,955 passenger vehicle occupants age 5 and older in 2017 (latest data available), and, if all passenger vehicle occupants age 5 and older had worn seat belts, an additional 2,549 lives could have been saved.¹

This project supports NHTSA's efforts to increase occupant protection by examining factors related to seat belt use. Previous research in this area indicated that news organizations may not report seat belt use in many of the driving fatalities they cover.² That said, the research conducted previously involved data from 1999 through 2002, which may be out of date with current practices. Many stakeholders assume that increased reporting of seat belt usage in fatal crashes, especially when seat belts were not worn, could increase seat belt use. In addition, when seat belt status has been reported in a news report, it is not clear individuals are paying attention. Improving awareness of seat belt status, particularly involving unbelted fatalities, may be an effective countermeasure that may encourage individuals to wear seat belts.

The information from this collection will assist NHTSA in (a) planning seat belt program activities; (b) supporting groups involved in improving public safety; and (c) identifying countermeasure strategies that are most

acceptable and effective in increasing seat belt use.

Affected Public: Participants will be U.S. adults (18 years and older, except for those from Nebraska or Alabama (who will need to be 19 years or older), or those from Mississippi (who will need to be 21 years or older)) with fluency in reading and writing in English, who have driven a passenger vehicle (car, van, SUV, or pickup truck) at least once in the past month, and whose main form of transportation is a passenger vehicle.

Estimated Number of Respondents: 20,850 total respondents, with 1,500 participating in the full experiment.

The experiment will invite up to 20,850 people to participate. The number of invitations is based on the need to recruit 1,500 participants, 750 of whom are either non- or part-time seat belt users. Based on corporate experience with online panels, the marketing research firm providing access to their panel of participants estimates a participation rate of 20%. Furthermore, NHTSA research has shown that while most drivers reported wearing their seat belts every time they drive, approximately 20% are either non-users or part-time users.³ Finally, NHTSA estimates that 90% who qualify and read the consent form will provide consent and complete the study. To obtain a sample of 750 consenting participants in the non/part user group, requires a universe of 20,850 potential respondents. Of the 20,850 invited panelists, we expect 20% or 4,170 volunteers who are interested and qualify. Of the 4,170 who are interested, we expect 20% or 834 volunteers will be non- or part-time seat belt users. Of the 834 volunteers who are non- or part-time seat belt users, we expect 90% or 750 to consent and complete the study. The marketing research firm will provide a link to the consent form to the first 834 non- or part-time seat belt users and to the first 834 full-time seat belt users who are interested and qualify. (Once the firm reaches 750 completions from full-time users, which is expected to occur before the 750 completions from non- or part-time users, they will no longer provide links to the informed consent to qualified full-time users.)

Frequency: This study is a one-time information collection, and there will be no recurrence.

Estimated Total Annual Burden Hours: The total estimated burden associated with this collection is 1,057

hours. The sample of potential participants will receive an email invitation from Schlesinger Group, a marketing research firm that specializes in providing sampling pools of panelists, with screening questions to determine eligibility. The 20,850 potential participants are expected to spend 1 minute each in reading the invitation email for an estimated 348 hours. Those who are interested

(estimated to be 20%, or 4,170 individuals) are expected to spend 1 minute each in completing the screener form for an estimated 70 hours. Schlesinger will provide electronic links to the consent form to the first 834 full-time seat belt users and to the first 834 part-time/non-users who qualify based on the screening questions. The 1,668 eligible participants are expected to spend 5 minutes each reading and

completing the consent form for an estimated 139 hours. The estimated 1,500 consenting participants will each spend 20 minutes completing the experiment for an estimated 500 hours. The total burden is the sum of the burden across the invitation/screening, consenting, and completing the experiment for a total estimate of 1,057 hours. The details are presented in Table 1 below.

TABLE 1—ESTIMATED BURDEN HOURS BY FORM

Form	Description	Participants	Estimated minutes per participant	Total estimated burden hours per form
Form 1599	Invitation Email	20,850	1	348
Form 1604	Screener Form	4,170	1	70
Form 1600	Informed Consent Form	1,668	5	139
Form 1601	Experiment Form	1,500	20	500
Total	1,057

Estimated Total Annual Burden Cost: NHTSA estimates that there are no costs to respondents beyond the time spent participating in the study.

Public Comments Invited: You are asked to comment on any aspects of this information collection, including (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (b) the accuracy of the Department's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; 49 CFR 1.49; and DOT Order 1351.29.

Issued in Washington, DC.

Nanda Narayanan Srinivasan,

BILLING CODE 4910–59–P

DEPARTMENT OF THE TREASURY

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Multiple Alcohol and Tobacco Tax and Trade Bureau Information Collection Requests

AGENCY: Departmental Offices, U.S. Department of the Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The public is invited to submit comments on these requests.

DATES: Comments must be received on or before October 28, 2021.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Copies of the submissions may be obtained from Molly Stasko by emailing PRA@treasury.gov, calling (202) 622–8922, or viewing the entire information collection request at www.reginfo.gov.

SUPPLEMENTARY INFORMATION:

Alcohol and Tobacco Tax and Trade Bureau (TTB)

1. *Title:* Volatile Fruit-Flavor Concentrate Plans-Applications and Related Records.

OMB Control Number: 1513–0006.

Type of Review: Extension of a currently approved collection.

Description: Volatile fruit-flavor concentrates contain alcohol when made from the mash or juice of a fruit by an evaporative process. Under the Internal Revenue Code (IRC) at 26 U.S.C. 5511, alcohol excise taxes and most other provisions of chapter 51 of the IRC do not apply to such concentrates if their manufacturers file applications, keep records, and meet certain other requirements prescribed by regulation. Under that IRC authority, the TTB regulations in 27 CFR part 18 require volatile fruit-flavor concentrate manufacturers to register using form TTB F 5520.3, file amendments to their registrations using that form or a letterhead application (depending on circumstances), and maintain a record file of all approved registrations and related supporting documents. TTB uses the collected information to identify concentrate manufacturers and their operations to ensure that the tax provisions of the IRC are appropriately applied.

Form Number: TTB F 5520.3.

Recordkeeping Number: TTB REC 5520/2.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 55.

Frequency of Response: On occasion.
