

\$10,632 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the calculation methodology for labor hours in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the respondents is very low, negative or non-existent. However, due to a mathematical correction, there is a decrease of eight hours in respondent labor hours.

This ICR has been updated with the most recent available labor rates for each of the three labor categories. There is an increase in both respondent and Agency costs resulting from labor rate increases from 2003 to 2009. This ICR uses 2009 labor rates because burden and cost calculations in Tables 1 and 2 of this ICR were expanded to include managerial and clerical labor rates, and the previous ICR only provided a technical labor rate. The cost figure has also been updated to the nearest dollar, whereas the previous ICR rounded the figure to the nearest thousand dollar.
