III. Registration Review Background

Section 3(g) of the FIFRA requires EPA to periodically review registered pesticides to ensure that each pesticide continues to satisfy the statutory standard for registration; that is, the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. See 7 U.S.C. 136a(g); 40 CFR 155.40(a). Through its registration review program, EPA reevaluates each pesticide’s registration based on current scientific and other knowledge about the pesticide, including its effects on human health and the environment, taking into consideration any changes in

law, regulations, or policy since the last review. EPA has promulgated regulations governing the registration review process in 40 CFR part 155, subpart C.

Pursuant to 40 CFR 155.46, EPA may decide that registration review is complete and additional review is not needed for certain pesticides. That regulation provides the following: “The Agency may determine that there is no need to reconsider a previous decision that a pesticide satisfies the standard of registration in FIFRA. In such cases, instead of establishing a pesticide registration review case docket as described in § 155.50, the Agency may

propose that, based on its determination that a pesticide meets the FIFRA standard for registration, no further review will be necessary. In such circumstances, the Agency will publish a notice in the **Federal Register** announcing the availability of the proposed decision and provide a comment period of at least 60 calendar days. The Agency will publish a notice in the **Federal Register** announcing the availability of a final version of the decision, an explanation of any changes to the proposed decision and its response to any comments. The date of the final notice of availability would be used as the date of the latest registration
