

Determination pursuant to 40 CFR part 93, subpart B, which establishes the process for complying with the general conformity requirements of the Clean Air Act. Consistent with those regulations, FRA published a notice in the **Federal Register** on April 20, 2012 advising the public of the availability of the Draft Conformity Determination for a 30-day review and comment period. Copies of the Draft Conformity Determination were made available with the Final EIR/EIS at various locations in the Project area and were also posted to the Authority and FRA's Web sites. The comment period on the Draft Conformity Determination closed on May 29, 2012. FRA received one comment from the U.S. Environmental Protection Agency (USEPA), a response to which was included in the Final General Conformity Determination published on September 18, 2012.

The Final General Conformity Determination was developed after extensive consultation with the San Joaquin Valley Air Pollution Control District (SJVAPCD), the Authority, and the U.S. Environmental Protection Agency. The analysis found that the Project's potential emissions during the Project construction period would exceed the General Conformity *de minimis* threshold for two precursor criteria pollutants, nitrogen oxides (NOx) and volatile organic compounds (VOC), a precursor for ozone. However, operation of the Project (*i.e.*, operation of the high-speed train, once the infrastructure was constructed) would result in an overall reduction of regional emissions of all applicable air pollutants and would not cause a localized exceedence of an air quality standard. Since the Project will result in the exceedence of the *de minimis* thresholds for the precursor criteria pollutants listed above during the construction phase, Project conformity with the applicable emission standards will be accomplished through a combination of efforts to use cleaner-than-average construction equipment and a Voluntary Emissions Reduction Agreement (VERA) between the Authority and the SJVAPCD. The VERA will offset the NOx and VOC emissions, consistent with applicable regulatory requirements, by funding (by the Project) local emissions reductions projects such as replacement and/or retrofit of existing diesel agricultural pumps, farm tractors, heavy trucks, etc. The Final General Conformity Determination is available for public review on FRA's Web site at http://www.fra.dot.gov/rpd/freight/fp_
