

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****[Project No. 10822–013]****Notice of Availability of Environmental Assessment: Town of Canton, Connecticut**

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed an application submitted by the Town of Canton, Connecticut (applicant), for the reinstatement, amendment, and transfer of license for the Upper Collinsville Project No. 10822. The project is on the Farmington River near the village of Collinsville, Hartford County, Connecticut. The project does not occupy federal lands.

An environmental assessment (EA) has been prepared as part of staff's review of the proposal. In the application, the applicant proposes to rehabilitate the project, install a Kaplan turbine with a total installed capacity of 1,000 kilowatts, provide upstream and downstream fish and eel passage, and provide additional environmental measures, including water quality monitoring, mussel relocation, and recreation. The applicant requests the Commission to reinstate the license with a new term of 40–50 years. The EA contains Commission staff's analysis of the probable environmental impacts of the proposed action and concludes that approval of the proposal would not constitute a major federal action significantly affecting the quality of the human environment.

The EA is available for review and reproduction at the Commission's Public Reference Room, located at 888 First Street NE, Room 2A, Washington, DC 20426. The EA may also be viewed on the Commission's website at <http://www.ferc.gov> using the "elibrary" link. Enter the docket number (P–10822) in the docket number field to access the document. ICR status: This ICR (EPA ICR Number 1741.08, OMB Control Number 2070-0145) is currently scheduled to expire on June 30, 2018. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. Under PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The OMB control numbers are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable.

Abstract: This ICR pertains to the form that the chemical industry uses exclusively in submitting requests to EPA's Office of Pollution Prevention and Toxics (OPPT) for correcting misreported chemical identities of substances listed on the Inventory. Such requests pertain only to errors discovered in the original submissions to the Inventory when established in 1979.

Section 8(b) of the Toxic Substances Control Act (TSCA) requires EPA to compile and keep current an Inventory of Chemical Substances in Commerce, which is a listing of chemical substances manufactured, imported, and processed for commercial purposes in the United States. The purpose of the Inventory is to define, for the purpose of TSCA, what chemical substances exist in U.S. commerce. Since the Inventory thereby performs a regulatory function by distinguishing between existing chemicals and new chemicals, it is imperative that the Inventory be accurate. However, from time to time, EPA or respondents discover that substances have been incorrectly described by reporting companies. Reported substances have been unintentionally misidentified as a result of simple typographical errors, the misidentification of substances, or the lack of sufficient technical or analytical information to characterize fully the exact chemical substances. EPA has developed guidelines (45 FR 50544, July 29, 1980) under which incorrectly described substances listed in the Inventory can be corrected. The correction mechanism ensures the accuracy of the Inventory without imposing an unreasonable burden on the chemical industry. Without the Inventory correction mechanism, a company that submitted incorrect information would have to file a pre-manufacture notification (PMN) under TSCA section 5 to place the correct chemical substance on the Inventory whenever the previously reported substance is found to be misidentified. This would impose a much greater burden on both EPA and the submitter than the existing correction mechanism. This information collection applies to reporting and recordkeeping activities associated with the correction of misreported chemical substances found on the TSCA Inventory.

Respondents may claim all or part of a response confidential. EPA will disclose information that is covered by

a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Form numbers: TSCA Chemical Substance Inventory Reporting Form C (EPA Form 7710-3C).

Respondents/affected entities: Manufacturers or importers of chemical substances, mixtures or categories listed on the TSCA Inventory and regulated under TSCA section 8, who had reported to EPA during the initial effort to establish the TSCA Inventory in 1979, and who need to make a correction to that submission.

Respondent's obligation to respond: Voluntary.

Total estimated number of respondents: 9.

Frequency of response: On occasion.

Total estimated burden: 39.24 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$3,029.72 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is increase of 19 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase reflects program changes in CBI substantiation requirements, as enacted in the Frank R. Lautenberg Chemical Safety Act for the 21st Century, which amended TSCA in 2016. This change is the result of a program change.

Courtney Kerwin,

Director, Collection Strategies Division.
