

operator also presents data that justify that an acceptable level of safety will be maintained. Paragraph (c) of this AD specifies the office that may approve such requests. We have made no change to the final rule in this regard.

Conclusion

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change described previously. The FAA has determined that this change will neither increase the economic burden on any operator nor increase the scope of the AD.

Cost Impact

The FAA estimates that 440 airplanes of U.S. registry will be affected by this AD, that it will take approximately 10 work hours per airplane to accomplish the required actions, and that the average labor rate is \$65 per work hour. Required parts will cost approximately \$2,200 per airplane. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be \$1,254,000, or \$2,850 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities

under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

Adoption of the Amendment

■ Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. Section 39.13 is amended by adding the following new airworthiness directive:

2004-06-02 Airbus: Amendment 39-13528. Docket 2002-NM-18-AD.

Applicability: Model A319, A320, and A321 series airplanes; certificated in any category; on which Airbus Modification 30821 has not been accomplished.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of a lower guide rod fitting, which could cause a rear passenger door to jam during opening, delaying an emergency evacuation and resulting in injury to passengers or crew members, accomplish the following:

Replacement

(a) Within 22 months after the effective date of this AD, replace the lower guide rod fitting on each rear passenger door with an improved fitting by doing all actions in and per the Accomplishment Instructions of Airbus Service Bulletin A320-53-1154, Revision 2, dated March 7, 2003.

Replacements Accomplished Previously

(b) Replacements of the lower guide rod fitting accomplished before the effective date of this AD per the Accomplishment Instructions of Airbus Service Bulletin A320-53-1154, dated July 12, 2001; or Revision 1, dated August 28, 2002; are acceptable for compliance with the corresponding action required by this AD.

Alternative Methods of Compliance

(c) In accordance with 14 CFR 39.19, the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, is authorized to approve alternative methods of compliance for this AD.

Incorporation by Reference

(d) Unless otherwise specified in this AD, the actions shall be done in accordance with Airbus Service Bulletin A320-53-1154, Revision 2, dated March 7, 2003. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Airbus, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Note 1: The subject of this AD is addressed in French airworthiness directive 2001-634(B), dated December 26, 2001.

Effective Date

(e) This amendment becomes effective on April 22, 2004.

Issued in Renton, Washington, on March 9, 2004.

Kalene C. Yanamura,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 2001-NM-239-AD; Amendment 39-13529; AD 2004-06-03]

RIN 2120-AA64

Airworthiness Directives; Airbus Model A319, A320, and A321 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Airbus Model A319, A320, and A321 series airplanes, that requires checking the identification plate on the ram air turbine (RAT) actuator and re-identifying the actuator or replacing the actuator with one which has been cleaned and tested by its manufacturer. This action is necessary to prevent jamming of the RAT actuator in an emergency which requires deployment of the RAT, and consequent loss of hydraulic and electrical power in the airplane. This action is intended to address the identified unsafe condition.

DATES: Effective April 22, 2004.

The incorporation by reference of certain publications listed in the regulations is approved by the Director

of the Federal Register as of April 22, 2004.

ADDRESSES: The service information referenced in this AD may be obtained from Airbus, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aerospace Engineer, International Branch, ANM-116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (425) 227-2125; fax (425) 227-1149.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Airbus Model A319, A320, and A321 series airplanes was published in the **Federal Register** on December 17, 2003 (68 FR 70210). That action proposed to require checking the identification plate on the ram air turbine (RAT) actuator and re-identifying the actuator or replacing the actuator with one which has been cleaned and tested by its manufacturer.

Comments

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were submitted in response to the proposal or the FAA's determination of the cost to the public.

Conclusion

The FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

Cost Impact

The FAA estimates that 195 airplanes of U.S. registry will be affected by this AD, that it will take approximately 5 work hours per airplane to accomplish the required actions, and that the average labor rate is \$65 per work hour. There would be no cost for required parts. Based on these figures, the cost

impact of the AD on U.S. operators is estimated to be \$63,375, or \$325 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration

amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. Section 39.13 is amended by adding the following new airworthiness directive:

2004-06-03 Airbus: Amendment 39-13529. Docket 2001-NM-239-AD.

Applicability: Model A320 series airplanes which have received modification 27189; Model A319 series airplanes; and Model A321 series airplanes, provided that none has received modification 30978 or 28413; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent jamming of the ram air turbine (RAT) actuator in an emergency which requires deployment of the RAT, and consequent loss of hydraulic and electrical power in the airplane, accomplish the following:

Extension of RAT Actuator

(a) Within 31 months after the effective date of this AD: Extend the existing RAT actuator, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320-29-1098, Revision 02, dated February 20, 2003.

Determination of Identification of RAT Actuator

(b) Immediately after accomplishment of paragraph (a) of this AD: Check the identification plate on the RAT actuator to determine the part number (P/N), the serial number, and whether there is a notation in the Amend Block, in accordance with the Accomplishment Instructions of Hamilton Sundstrand/Arkwin Industries Service Bulletin ERPS08A-29-2, dated February 22, 2001.

Retraction, Re-identification, or Replacement of RAT Actuator

(c) Depending upon the identification of the RAT actuator, accomplish the follow-on action indicated in Table 1 of this AD, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320-29-1098, Revision 02, dated February 20, 2003.

TABLE 1.—FOLLOW-ON ACTIONS

If the P/N is—	And the Amend Block is marked with an "A"—	And the serial number is—	Then—
764711A	N/A	N/A	No further action is required.
764711	No	N/A	Prior to further flight, remove the RAT actuator and replace it with one which has been cleaned, tested and re-identified by its manufacturer.

TABLE 1.—FOLLOW-ON ACTIONS—Continued

If the P/N is—	And the Amend Block is marked with an "A"—	And the serial number is—	Then—
764711	Yes	0868–0889 ...	Prior to further flight, remove the RAT actuator and replace it with one which has been cleaned, tested and re- identified by its manufacturer.
764711	Yes	Other than 0868–0889.	Prior to further flight, reidentify the RAT actuator, in accordance with paragraph 2.G. of the Accomplishment Instructions of Hamilton Sundstrand/Arkwin Industries Service Bulletin ERPS08A–29–2, dated February 22, 2001.

Parts Installation

(d) *As of the effective date of this AD:* No person may install an Arkwin Industries RAT actuator having P/N 764711 on any Airbus Model A319, A320, or A321 airplane, unless it is in compliance with this AD.

Incorporation by Reference

(e) The actions shall be done in accordance with Airbus Service Bulletin A320–29–1098, Revision 02, dated February 20, 2003; and Hamilton Sundstrand/Arkwin Industries Service Bulletin ERPS08A–29–2, dated February 22, 2001; as applicable. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Airbus, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Note 1: The subject of this AD is addressed in French airworthiness directive 2001–236(B) R1, dated December 24, 2002.

Effective Date

(f) This amendment becomes effective on April 22, 2004.

Issued in Renton, Washington, on March 9, 2004.

Amendments to the Export Administration Regulations (EAR) Implementing the Understandings Reached at the June 2003 Australia Group (AG) Plenary Meeting and a Subsequent AG Interseasonal Decision on Certain Animal Pathogens

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Final rule.

SUMMARY: The Bureau of Industry and Security (BIS) is publishing this final rule to describe the understandings reached at the June 2003 plenary meeting of the Australia Group (AG) and to amend the Export Administration Regulations (EAR), as needed, to implement these AG understandings. Specifically, this final rule amends the EAR by adding twelve new viruses and two new bacteria to the list of AG-controlled human and zoonotic pathogens and toxins described on the Commerce Control List (CCL).

This rule also amends the EAR to implement an AG interseasonal decision, which was adopted after the June 2003 AG plenary meeting, by adding two viruses to the list of AG-controlled animal pathogens described on the CCL.

Finally, this rule updates the list of countries that are currently States Parties to the Chemical Weapons Convention (CWC) by adding nine countries that recently became States Parties: Afghanistan, Belize, Cape Verde, Kyrgyzstan, Libya, Sao Tome and Principe, Timor Leste, Tonga, and Tuvalu.

DATES: This rule is effective March 18, 2004.

ADDRESSES: Written comments should be sent to Willard Fisher, Regulatory Policy Division, Office of Exporter

Services, Bureau of Industry and Security, Room 2705, 14th Street and Pennsylvania Avenue, NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT:

Douglas Brown, Office of Nonproliferation Controls and Treaty Compliance, Bureau of Industry and Security, Telephone: (202) 482–7900.

SUPPLEMENTARY INFORMATION:**Background**

A. Revisions to the EAR Based on the June 2003 Plenary Meeting of the Australia Group

The Bureau of Industry and Security (BIS) is amending the Export Administration Regulations (EAR) to implement the understandings reached at the annual plenary meeting of the Australia Group (AG) that was held in Paris on June 2–5, 2003. The Australia Group is a multilateral forum, consisting of 33 participating countries, that maintains export controls on a list of chemicals, biological agents, and related equipment and technology that could be used in a chemical or biological weapons program. The AG periodically reviews items on its control list to enhance the effectiveness of participating governments' national controls and to achieve greater harmonization among these controls.

The understandings reached at the June 2003 plenary meeting resulted in multiple additions to the list of biological agents controlled by the AG. This final rule implements these changes by amending the EAR to add twelve new viruses and two new bacteria to the list of AG-controlled human and zoonotic pathogens and toxins described in Export Control Classification Number (ECCN) 1C351 on the Commerce Control List (CCL) (Supplement No. 1 to Part 774 of the EAR).

Specifically, this rule adds the following twelve viruses to the list of AG-controlled viruses described in ECCN 1C351.a on the CCL: Kyasanur Forest virus, Louping ill virus, Murray Valley encephalitis virus, Omsk haemorrhagic fever virus, Oropouche
