

reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the United States Environmental Protection Agency (EPA) regional office.

Form Numbers: None.

Respondents/affected entities:

Facilities with RPC production operations and processes.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart WWWW).

Estimated number of respondents: 600 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 20,900 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,580,000 (per year), includes \$476,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred because the total number of respondents has increased, after accounting for anticipated industry growth over three years. The increase in O&M costs is due to the inclusion of the MACT compliance standard for SMC enclosure for one large facility, based on comment received from industry consultation.

Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through September 30, 2015. Public comments were previously requested via the **Federal Register** (79 FR 30117) on May 27, 2014, during a 60-day comment period. This notice allows for an additional 30 days for public comments. Abstract: The affected entities are subject to the General Provisions of the

NESHAP (40 CFR part 61, subpart A), and any changes, or additions, to the Provisions are specified at 40 CFR part 61, subpart FF. Owners or operators of the affected facilities must submit an initial notification report, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of facilities that generate or receive benzene waste.

Respondent's obligation to respond: Mandatory (40 CFR part 61, subpart FF).

Estimated number of respondents: 270 (total).

Frequency of response: Initially, occasionally, quarterly and annually.

Total estimated burden: 19,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,930,000 (per year), including \$0 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the respondent burden from the most recently approved ICR. The increase is primarily attributed to correcting an entry error in the number of respondents that record monthly benzene waste concentration data under Table 1, labor item 4(c)(ii). In addition, we have rounded all total values to 3 significant figures.

There is also an adjustment increase in the number of responses due to a correction. The previous ICR did not account for quarterly emission reports and notifications of offsite facilities in calculating the number of responses.

Acting Director, Collection Strategies Division.
