**SUPPLEMENTARY INFORMATION FOR 2700–0135:****I. Abstract**

The NASA Kennedy Space Center (KSC) manages and facilitates the center-specific Job Shadowing Program (JSP). The program targets high school and undergraduate students and offers an opportunity to experience the practical application of STEM, business, and other disciplines aligned to NASA’s long-term workforce needs, in a NASA-unique workplace setting. Program participants receive insight into NASA and KSC’s history, current activities, and other student opportunities through briefings, tours, and career panels. Each participant is then matched with a subject matter expert to gain direct exposure to the implementation of their respective fields of interest and related career paths.

**SUPPLEMENTARY INFORMATION FOR 2700–0150:****I. Abstract**

NASA’s founding legislation, the Space Act of 1958, as amended, directs the Agency to expand human knowledge of Earth and space phenomena and to preserve the role of the United States as a leader in aeronautics, space science, and technology. The NASA Office of Education has three primary goals (1) strengthen NASA and the Nation’s future workforce, (2) attract and retain students in science, technology, engineering and mathematics, or STEM, disciplines, and (3) engage Americans in NASA’s mission. This notice informs the public of NASA’s intent to revise a currently approved information collection for a project formerly known as the NASA Summer of Innovation Project. The request for renewal pertains to the administration of surveys to youth in support of the agency’s STEM challenge activities for middle school youth. The information collection was revised to collect the minimum amount of data required to (1) evaluate the activity for improvement opportunities, and (2) collect outcome data to assess the activity model’s effectiveness in meeting its intended objectives. Youth surveys have been retained in this information collection, but the parent survey and teacher focus groups have been eliminated to reduce burden. The number of youths participating in this information collection has been reduced to reflect the estimated number of participants who will be engaged in this activity in the future. The cost of the information collection, to participating members of the public, has also been reduced as a result of these and other changes to the information collection.

**SUPPLEMENTARY INFORMATION FOR 2700–0157:****I. Abstract**

The National Aeronautics and Space Administration seeks to collect information from members of the public to plan, conduct, and register participants and volunteers for the NASA Human Exploration Rover Challenge, which supports science, technology, engineering, or mathematics (STEM) education. This engineering design challenge focuses on NASA’s current plans to explore planets, moons, asteroids, and comets—all members of the solar system family. The challenge will focus on designing, constructing, and testing technologies for mobility devices to perform in these different environments, and it will provide valuable experiences that engage students in the technologies and concepts that will be needed in future exploration missions. NASA collects the minimum information necessary from teams, participants, and volunteers to plan and conduct the event.

**SUPPLEMENTARY INFORMATION FOR 2700–0184:****I. Abstract**

The NASA Universal Registration and Data Management System is a comprehensive tool designed to allow learners (*i.e.*, students, educators, and awardee principal investigators) to apply to NASA STEM engagement

opportunities (e.g., internships, fellowships, challenges, educator professional development, experiential learning activities, etc.) in a single location. NASA personnel manage the selection of applicants and implementation of engagement opportunities within the Universal Registration and Data Management System. The information collected will be used by the NASA Office of STEM Engagement (OSTEM) in order to review applications for participation in NASA engagement opportunities. The information is reviewed by OSTEM project and activity managers, as well as NASA mentors who would be hosting students. This information collection will consist of student-level data such as demographic information submitted as part of the application. In addition to supporting student selection, student-level data will enable NASA OSTEM to fulfill federally mandated reporting on its STEM engagement activities and report relevant demographic information as needed for Agency performance goals and success criteria (annual performance indicators).
