

direct impacts by development in the wetlands themselves or indirect impacts from other activities associated with development of adjacent upland areas at Parcel G. Wetlands downstream from Parcel G could also be affected by any construction activities on Parcel G.

A number of administrative controls, including deed restrictions or conservation easements are available for DOE to use in order to prevent adverse impacts to wetlands at Parcel G. Proposals for development of Parcel G that would affect wetlands and other special aquatic resources would also be subject to regulation by the U.S. Army Corps of Engineers (USACE), Tennessee Department of Environment and Conservation (TDEC), and possibly the Tennessee Valley Authority (TVA). Proposed projects would be required to follow normal sequencing during regulatory review to avoid and minimize adverse impacts to wetlands at Parcel G. Compensatory mitigation should be used as a last resort and would be subject to negotiation between the USACE, TDEC, and possibly DOE and TVA.

In accordance with DOE regulations for compliance with wetlands environmental review requirements (10 CFR part 1022), a wetland assessment will be included within the Environmental Assessment for the Proposed Conveyance of the American Museum of Science and Energy, Parcel G, and Parcel 279.01 to the City of Oak Ridge, Tennessee (DOE/EA-1415).

Issued in Oak Ridge, Tennessee, on March 12, 2002.
