Animals would be trained using
positive reinforcement and would

experimental sessions per day, up to seven days per week annually at Long Marine Laboratory. This research would improve knowledge of pinniped sensory adaptations, examine mechanisms for acquiring and processing sensory information, and develop procedures for rapidly and humanely studying marine mammal hearing and the effects of anthropogenic noise. These efforts would support research priorities for marine mammals that have been identified by the National Research Council. The permit has been requested for a 5-year period.
