POLICY JUSTIFICATION

Korea—AIM-9X Block II Tactical Sidewinder Missiles

The Republic of Korea has requested to buy one hundred fifteen (115) AIM-9X Block II Tactical Sidewinder missiles; fifty (50) AIM-9X Block II Captive Air Training Missiles (CATM); twenty (20) AIM-9X Block II Tactical Missile Guidance Units; and twenty (20) AIM-9X Block II CATM Guidance Units. Also included are containers, weapon system support, software, surface transportation, missile technical assistance, and other technical assistance; and other related elements of program support. The estimated total cost is \$158.1 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by helping to improve the security of a treaty ally that continues to be an important force for political stability, peace, and economic progress in North East Asia.

The proposed sale will assist the Republic of Korea in developing and maintaining a strong and ready self-defense capability. The Republic of Korea will have no difficulty absorbing these missiles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon Corporation, Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the Republic of Korea.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 20–60

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AIM-9X Block II SIDEWINDER Missile is a short-range, air-to-air missile. The AIM-9X Block II SIDEWINDER Missile provides a high off-boresight seeker, enhanced countermeasure rejection capability, low drag/high angle of attack airframe and the ability to integrate the Helmet Mounted Cueing System. The software algorithms are the most sensitive portion of the AIM-9X missile. The software continues to be modified via a pre-planned product improvement (P³I) program in order to improve its counter-countermeasure capabilities. No software source code or algorithms will be released.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Republic of Korea can provide substantially the same degree of

protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Republic of Korea.

POLICY JUSTIFICATION

Guyana—Bell 412EPi and 429 Helicopters

The Government of Guyana has requested to buy two (2) Bell 412EPi Light Utility Helicopters with customer-unique modifications; two (2) Bell 429 Light Utility Helicopters with customer-unique modifications; two (2) WESCAM MX-10 cameras; mission equipment; contractor-provided pilot and maintainer training; particular ground support equipment; spares; publications; integrated product support; technical assistance; transportation; Repair and Return; and other related elements of logistics and program support. The total estimated program cost is \$256 million.

This proposed sale will support the foreign policy and national security of the United States by helping to improve security of Guyana, which is expected to grow to be an important force for political stability and economic progress in South America.

The proposed sale of the Bell 412EPi and 429 helicopters will improve Guyana's capability to meet current and future threats. Guyana will use the enhanced capability to strengthen its homeland defense; conduct maritime surveillance, patrol, and interdiction; counter narcotic trafficking and transnational criminal organizations; deter regional threats; and support coalition partners overseas. Guyana will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Bell Helicopter Textron Incorporated (BHTI), Piney Flats, TN. The purchaser typically requests offsets. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor representatives to Guyana.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 20-25

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Bell 412EPi is a twin-engine, 1 + 14 passenger capacity, newly manufactured utility helicopter with IFR Medium Twin (3-Axis) with Bell BASIX-PRO Integrated Avionics System and Pratt & Whitney PT6T-9 Engine TwinPac with Electronic Engine Controls (EEC/FADEC). The Bell BASIX-PRO Integrated Avionics Systems includes Multi-Functional Electronic Flight Instrument System (EFIS) 6" X 8' LED PFD/MFD Displays (EICAS, PIS, SYS Diag., HSI, VOR, GPS, ADF, Speed, Alt, TAS, Video FDM) – Pilot and Copilot (4 per ship), IFR FAA Kit, AFCS/Dual Digital Flight Director Nav Coupler (3 – Axis) with Stability Augmentation System (SAS), Attitude Retention (ATT), NAVI/COM1/VHF/GPSI/VOR/ILS/LOC/GS/WAAS Garmin GTN-750, 16 Watt with Regional Map Database, Radar Altimeter #1 (KRA-405B), Distance Measuring Equipment, DME (KDM-706A), Automatic Direction Finder (ADF) – (KDF-806), Air Data Computer (ADC), Altitude & Heading Reference System (LCR-100). The Bell 412EPi is in the Search and Rescue (SAR) with Automatic Flight Control System (AFCS) configuration. The SAR system is composed of a navigation computer with SAR modes, and AFCS that provides coupled SAR functions, hoist operator control, a hover speed reference system, and two radio altimeters. This aircraft (before modification) is generally offered to the public with no special restrictions.

2. The Bell 429 is a light twin, newly manufactured helicopter. The Bell 429 features two/three multi-function displays, dual digital 3-axis autopilot and an integrated electronic data recorder provides enhanced situational awareness and post flight analysis. The Bell 429 standard configuration consists of Dual Pilot Control Provisions, Radar Altimeter (Honeywell KRA 4058, GPS GTN 750 HT A WS upgrade), Traffic Avoidance System – TAS605 with Muteable Audio (Avidyne), NAV/COM/GPS – GTN-750 ChartView Upgrade, Weather Radar (Honeywell ART/RDR-2000) Original Radome (Displayed on GTN-750). This aircraft (before modification) is generally offered to the public with no special restrictions.

3. The U.S. Government will provide modified aircraft that are globally self-deployable and appropriately equipped

to be able to meet the communications, navigation, surveillance and Air Traffic Management (CNS/ATM) requirements for unrestricted transit through domestic and International Civil Aviation Organization (ICAO) civilian-controlled and military-controlled airspace.

4. The WESCAM MX-10 is a small Multi-Sensor, Multi-Spectral Imaging System with Inertial Measurement Unit (IMU) and Embedded with Global Positioning System (GPS) Standard Positioning Service (SPS). The WESCAM MX-10 camera system contains a HG-1900BA50 IMU manufactured by Honeywell in the United States. WESCAM MX-10 is embedded with GPS SPS. SPS is a three-dimensional position and time determination capability provided to a user equipped with a minimum capability GPS SPS receiver in accordance with GPS national policy. The HG-1900BA50 includes Micro-Electro Mechanical Systems (MEMS) gyros and quartz resonating beam accelerometers and is an MTCR Category II controlled item, specifically 9.A.6..

5. If a technologically advanced adversary were to obtain knowledge of the hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

6. A determination has been made that Guyana can provide substantially the same degree of protection for the technology being released as the U.S. Government. This potential sale is necessary in furtherance of the U.S. foreign policy and national security objectives as outlined in the Policy Justification.

7. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Guyana.
