

development by external stakeholders with quality measure development expertise such as clinical specialty societies, clinical professional organizations, patient advocacy organizations, educational institutions, independent research organizations, health systems, and other entities engaged in quality measure development, and is therefore providing this Notice of Funding Opportunity. The CMS Meaningful Measurement framework <https://www.cms.gov/meaningful-measures-20-moving-measure-reduction-modernization> guides CMS's quality measures work.

II. Provisions of the Notice

For this NOFO, CMS will accept an application specifically and only for development of radiology electronic clinical quality measures (eCQM) that fill an existing gap or need and are high impact. Pending an acceptable application and budget, the CCSQ/Quality Measurement & Value-Based Incentives Group (QMVIG)/Division of Quality Measurement (DQM) Program Team recommends awarding a single source award to Alara Imaging who is uniquely qualified to complete the work requested. Alara Imaging has specific expertise with CMS in development of radiology measure(s) requested, can provide the proprietary software needed to capture imaging data, and has the ability to transfer those data to CMS. In addition, Alara would serve as the measure steward responsible for guiding the measure through NQF endorsement and the CMS regulatory process.

SUPPLEMENTARY INFORMATION:

Description: The Administrative Subpoena is used by State IV–D agencies to obtain income and other financial information regarding noncustodial parents for purposes of establishing, enforcing, and modifying child support orders. The Notice of Interstate Lien imposes liens in cases with overdue support and allows a State IV–D agency to file liens across state lines, when it is more efficient than involving the other state's IV–D agency. Section 452(a)(11) of the Social Security Act requires the Secretary of the Department of Health and Human Services to promulgate forms for administrative subpoenas and imposition of liens used by state child support enforcement (Title IV–D) agencies in interstate cases. Section 454(9)(E) of the Social Security Act requires each state to cooperate with any other state in using the federal forms for issuance of administrative subpoenas and imposition of liens in interstate child support cases.

Respondents: State, local, or tribal agencies administering a child support enforcement program under title IV–D of the Social Security Act.

Administration for Children and Families

Proposed Information Collection Activity; Pre-Testing of Evaluation Data Collection Activities (OMB #0970-0355)

AGENCY: Office of Planning, Research, and Evaluation, Administration for Children and Families, HHS.

ACTION: Request for public comment.

SUMMARY: The Administration for Children and Families (ACF) proposes to extend the existing overarching generic clearance for Pre-testing of Evaluation Data Collection Activities (Office of Management and Budget (OMB) #0970-0355) with no changes.

DATES: *Comments due within 60 days of publication.* In compliance with the requirements of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described above.

ADDRESSES: Copies of the proposed collection of information can be obtained and comments may be

forwarded by emailing OPREinfocollection@acf.hhs.gov. All requests, emailed or written, should be identified by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: The ACF Office of Planning, Research, and Evaluation (OPRE), at the U.S. Department of Health and Human Services (HHS) intends to request approval from OMB to renew a generic clearance to pre-test data collection instruments with more than nine participants to identify and resolve any question or procedural problems in survey administration.

OPRE studies ACF programs, and the populations they serve, through rigorous research and evaluation projects. These include evaluations of existing programs, evaluations of innovative approaches to helping low-income children and families, research syntheses, and descriptive and exploratory studies. To improve the development of its research and evaluation surveys, OPRE uses the pre-testing of evaluation surveys generic clearance to employ a variety of techniques including cognitive and usability laboratory and field techniques, behavior coding, exploratory interviews, respondent debriefing questionnaires, split sample

experiments, focus groups, and pilot studies/pre-tests. These activities allow OPRE to identify if and when a survey may be simplified for respondents, respondent burden may be reduced, and other possible improvements. Following standard OMB requirements, OPRE will submit a change request for each individual data collection activity under this generic clearance. Each request will include the individual instrument(s), a justification specific to the individual information collection, and any supplementary documents. OMB should review within 10 days of receiving each change request.

The information collected in this effort will not be the primary subject of any published ACF reports; however, information may be made public through methodological appendices or footnotes, reports on instrument development, instrument user guides, descriptions of respondent behavior, and other publications or presentations describing findings of methodological interest. When necessary, results will be labeled as exploratory in nature. The results of this pre-testing research may be prepared for presentation at professional meetings or publication in professional journals.

Respondents: Participants in ACF programs being evaluated; participants in ACF demonstrations; recipients of ACF grants and individuals served by ACF grantees; comparison group members; and other relevant populations, such as individuals at risk of needing ACF services.

ANNUAL BURDEN ESTIMATES

Survey development field tests, respondent debriefing questionnaires, cognitive interviews, split sample experiments, focus groups	3,825	1	1	3,825

or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.
