SUPPLEMENTARY INFORMATION:

Title of Collection: Evaluation of the Tribal Colleges and Universities Program.

OMB Control No.: 3145-NEW.

Expiration Date of Approval: Not applicable.

Abstract: Since 2001 the National Science Foundation's Tribal Colleges and Universities Program (TCUP) has been supporting science, technology, engineering, and mathematics (STEM) participation and retention among American Indians, Alaska Natives, and Native Hawaiians through the support of quality STEM teaching through faculty development, STEM degree and curriculum enhancement, and undergraduate research and training opportunities. The evaluation being conducted by Kauffman and Associates, Inc. focuses on a cross-site case study of the overall effectiveness of the programs as well as the impact the programs have had on participating institutions, STEM faculty, and students enrolled in STEM courses. To complement this comprehensive evaluation study three sub-studies—a model of practice study, an outcome study pertaining to the impact on institutional transformation, and a study about the STEM programmatic influences on student outcomes—will be conducted. The study will rely on a thorough review of college and STEM record assessments; telephone and face-to-face interviews with governing board members, college administrators, faculty members, and collaborative partners; focus groups with students, community members, faculty, and other stakeholders; and web-based surveys with alumni, governing board members, college presidents, administrators, and STEM faculty. The web-based surveys will be conducted with all grantees and past and present students and the interviews and focus groups will be conducted with the above specified populations at selected sites. The goal of this cross-site evaluation is to assess the effect of the STEM program on students, faculty, and administrators, to determine its overall effect on student achievement, outreach, and support in scientific research, faculty development, advancement, and

collaboration, and to assess institutional change and development of best practices for STEM.

Respondents: Governing board members, college presidents and academic vice presidents, collaborative partners, and students, past and present, at or working with Tribal colleges and universities awarded TCUP grants from NSF.

Estimated Number of Annual Respondents: 4,819 (total).

Burden on the Public: 815 hours.

Dated: December 30, 2009.

Reports Clearance Officer, National Science Foundation.
