

(representing 75% of the value of the finished inkjet ink) include potassium hydroxide, surfactants, 1,2 hexanediol, Tri-isopropanolamine, solvents, glycerin, triethylene glycol monobutyl ether, triethylene glycol, adipic acid, emulsifiers, disodium salt dihydrate, printing ink colorants (black, cyan, brown, orange, violet, red green, magenta and other), de-foamers, solublizers, and biocides (duty rates range from duty-free to 6.5%). The scope otherwise would remain unchanged.

FTZ procedures could exempt EPI from customs duty payments on the additional foreign components used in export production. The company anticipates that some 55 percent of the plant's shipments will be exported, either as finished inkjet ink or in inkjet cartridges. On its domestic sales, EPI would be able to choose the duty rates during customs entry procedures that apply to inkjet ink (duty rate—1.8%) or inkjet printer cartridges (duty-free) for the additional foreign inputs noted above. EPI would also be exempt from duty payments on foreign materials that become scrap or waste during the production process. The request indicates that the additional savings from FTZ procedures would help improve the plant's international competitiveness.

In accordance with the Board's regulations, Diane Finver of the FTZ Staff is designated examiner to evaluate and analyze the facts and information presented in the application and case record and to report findings and recommendations to the Board.
