Pacific Island Fisheries; Western Pacific Stock Assessment Review; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Western Pacific Fishery Management Council (Council) and NMFS will convene a Western Pacific Stock Assessment Review (WPSAR) of a stock assessment update for the multispecies bottomfish complex in Guam. The review will be conducted virtually. A satellite location will be made available for the public to view the review process and NMFS staff will be available in-person to answer questions. See **ADDRESSES** for the web address to access the meeting and the location of the satellite viewing site. **DATES:** The WPSAR meeting will be held between February 7 and February 8, 2024 (February 8 and 9, Chamorro Standard). See **SUPPLEMENTARY INFORMATION** for meeting dates and times and the daily agenda.

ADDRESSES: The meeting will be held by web conference via WebEx. Audio and visual portions for all of the web conferences can be accessed at: <https://wprfinc.webex.com/join/info.wpcouncilnoaa.gov>. Web conference access information and instructions for providing public comments will be posted on the Council website at www.wpcouncil.org. For assistance with the web conference connection, contact the Council office at (808) 552–8220.

The satellite viewing site for the WPSAR review is located at the Guam NOAA Field Office 770 East Sunset Blvd., STE 170, Tiyan, GU 96913.

FOR FURTHER INFORMATION CONTACT: Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council; telephone: (808) 522–8220.

SUPPLEMENTARY INFORMATION: The NMFS Pacific Islands Fisheries Science Center (PIFSC) conducted a stock assessment update for bottomfish management unit species (BMUS) in the U.S. territory of Guam. PIFSC previously conducted a 2019 benchmark stock assessment for the Guam bottomfish stock complex using a Bayesian surplus production model based on data through 2017. The 2019 assessment incorporated improvements to data standardization and model assumptions that followed recommendations from the review panel for the 2015 assessment for the same stock. PIFSC used production models to estimate biomass and stock status through time, and to evaluate stock status against maximum sustainable yield-based reference points set in the fishery ecosystem plan (FEP) for the Mariana Archipelago, which includes Guam. Based on the results of the 2019 assessment, NMFS determined the stock to be overfished but not experiencing overfishing. In 2022 NMFS and the Council implemented a plan to rebuild biomass of the stock consistent with requirements of the Magnuson Stevens Fishery Conservation and Management Act and the FEP.

The 2024 assessment update that will be reviewed in February used the methodology of the 2019 benchmark assessment and updated it with data through 2022. The 2024 assessment update will provide new information to inform management, including updates on biomass and fishing mortality relative to status determination thresholds to evaluate rebuilding progress, and projections to inform recommendations of allowable biological catch and annual catch limits.

SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for extension of an approved information collection. The Marine Mammal Protection Act (MMPA) (16 U.S.C. 1361 *et seq.*) mandates the protection and conservation of marine mammals and makes the taking, killing or serious injury of marine mammals, except under permit or exemption, a violation of the Act. An exemption is provided for Alaskan natives to take marine mammals if the taking is for subsistence or for creating and selling authentic native articles of handicraft and clothing. Possession of marine mammals and marine mammal parts by other than Alaskan natives is therefore prohibited (exception, 50 CFR 216.26: beach found non-Endangered Species Act (ESA) teeth or bones that have been registered with NOAA's National Marine Fisheries Service (NMFS)). As native handicrafts are allowed by the MMPA to enter interstate commerce, an exemption is also needed to allow non-natives to handle the skins or other marine mammal produce, whether to tan the pinniped hide or to act as an agent for the native to sell his handicraft products. The information is necessary for law enforcement purposes to ensure that only Alaska Indians, Aleuts, or Eskimos are submitting marine mammal hides or parts for tanning.

The information required by 50 CFR 216.23 is of two types. Applications: Information is required to identify the applicant as a tanner/agent in order to preclude prosecution under the MMPA and to determine that he/she has an acceptable record keeping program to accurately account for those marine mammal products received. This information serves as a deterrent for those individuals who might use this registration program for entering prohibited marine mammal products into interstate commerce. Reports: Information is also needed annually to evaluate the agent/tanner's activities during the year, and his/her procedures for bookkeeping and yearly inventory to assure NMFS, the Marine Mammal

Commission, and the general public that prohibited marine mammal products were not being transshipped through registered agents.

The reporting requirements are: report in writing to the Assistant Administrator for Fisheries, NMFS, any changes in the facts stated in Registrant's applications for this Certificate of Registration within 30 days of such change; maintain current records of each transaction authorized stating the marine mammals or marine mammal parts or products involved, from whom received, any processing accomplished, to whom returned, and the date of each such transaction. These records shall be kept separate and apart from other records maintained in the ordinary course of business and shall be retrained for not less than three years; and annually, during the month of January, send certified copies of such records (annual report) to the Assistant Administrator for Fisheries.

II. Method of Collection

Paper documentation is submitted to meet the requirements found at 50 CFR 216.23(c).

III. Data

OMB Control Number: 0648–0179.

Form Number(s): None.

Type of Review: Regular submission (extension of an existing information collection).

Estimated Time per Response: 2 hours for an application and 2 hours for a report.

Estimated Total Annual Burden Hours: 50.

Estimated Total Annual Cost to Public: \$150.00.
