

and pathways of exposure to phthalates in the general population, expectant mothers, and children. For example, what are the relative contributions of exposure from diet, consumer products, ambient air, and other sources, which may differ depending on the particular phthalate and the exposed population?

4. Data on consumer use patterns including the use of cosmetics and consumer products that may contain phthalates.

5. Data on children's activity patterns, including mouthing activity, exposure to household dust, dermal exposure to toys, and other potential child-specific exposure pathways.

6. Information relating to human exposure to phthalates and phthalate substitutes, including migration data, levels in environmental media (ambient and indoor air, water, soil, household dust), dermal exposure, oral exposure, and bioavailability.

7. New, unpublished, or soon-to-be published data on the types and levels of phthalates, phthalate substitutes, or their metabolites in human urine, blood, milk, or other biological media.

8. Information relating to metabolism or pharmacokinetic modeling that could be used to estimate human exposure from biomonitoring studies.

9. Toxicity data on the full range of phthalates and phthalate substitutes in commercial use, especially unpublished or soon-to-be-published studies.

10. Human data on the toxicity of phthalates, including epidemiological and clinical studies, especially unpublished or soon-to-be published studies.

11. Information on the relative sensitivity of potentially vulnerable populations, including the fetus, young children, and expectant mothers, and whether there are any other vulnerable populations that should be considered.

12. Information relating to assessing the cumulative (combined) risk from multiple phthalates, including dose response data, methodology, which health endpoint (or endpoints) is the most relevant to human risk assessment, and which phthalate substitutes or other compounds may contribute to the combined risk.

Any information submitted to CPSC in response to this request will become part of the public record. The CHAP is especially interested in unpublished studies relating to toxicity or exposure. However, the CHAP will not consider summaries of toxicological studies prepared by chemical manufacturers as substitutes for the complete studies.

There will be an opportunity for oral comments on July 26, 2010, from 10 a.m. to 5 p.m. Persons wishing to

present oral comments should file a request with the Commission's Office of the Secretary no later than July 1, 2010, and submit the text of their comments not later than July 12, 2010.
