

expenses. It is estimated that six FTE will be required to support the TGDC.

7. The Committee shall not act in the absence of a quorum, which shall consist of a simple majority of the members of the Committee not having a conflict of interest in the matter being considered by the Committee, except that, if the number of members on the Committee is even, half will suffice.

8. The EAC will create any subcommittees of the TGDC that may be necessary to accomplish the TGDC's function. In addition, the EAC will establish such operating procedures as required to support the TGDC, consistent with the Federal Advisory Committee Act, as amended.

*Duration:* While the duration of the Committee is continuing, the Charter shall be renewed every two years from the date of filing.

*Charter Filing Date:* This Charter was filed on the 23 day of June, 2004.

## DEPARTMENT OF ENERGY

### Office of Arms Control and Nonproliferation; Proposed Subsequent Arrangement

**AGENCY:** Department of Energy.

**ACTION:** Subsequent arrangement.

**SUMMARY:** This notice has been issued under the authority of Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160). The Department is providing notice of a proposed "subsequent arrangement" under the Agreement for Cooperation in the Peaceful Uses of Nuclear Energy between the United States and the European Atomic Energy Community (EURATOM) and the Agreement for Cooperation Between the United States and Japan Concerning Peaceful Uses of Nuclear Energy.

This subsequent arrangement concerns the retransfer of 594.94 grams of U.S.-origin uranium (2.26 grams U-235) and 7.04 grams plutonium from Studsvik Research Center, Nykoping, Sweden, to the Japan Atomic Energy Research Institute (JAERI). The nuclear material being retransferred is contained in segments of reactor fuel rods cut out at the Studsvik Hot Cell Laboratory for analysis of the burn up rates by JAERI. The analysis will support the Studsvik development of a database of information regarding how uranium

oxide and mixed-oxide (MOX) react at high burn-up rates.

These material segments will undergo post-irradiation examination at JAERI, which will take ownership of the material when the transport leaves Studsvik. Upon completion of the analysis, the material will be handled as waste and stored in Japan.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, we have determined that this subsequent arrangement is not inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

*Acting Director, Office of Nonproliferation Policy.*
