SUPPLEMENTARY INFORMATION:

I. Abstract

Under the proposed information requirement, vessels fishing for Atlantic highly migratory species (HMS) with pelagic longline gear on board would be required to install and operate a vessel monitoring system (VMS). On May 28, 1999, the National Marine Fisheries Service (NMFS) issued a regulation, 50 CFR 635.69(a), requiring all commercial pelagic longline vessels fishing for Atlantic HMS to install a NMFS-approved VMS.

The Bluewater Fisherman's Association filed a lawsuit challenging the VMS requirement, and the U.S. District Court for the District of Columbia remanded the regulation to the Secretary of Commerce for further consideration. On August 29, 2001 NMFS submitted a reconsideration memorandum to the court analyzing alternatives to and reaffirming the need for fleetwide implementation of VMS in the Atlantic pelagic longline fishery. On October 15, 2002, the U.S. District Court for the District of Columbia issued a final order that denied plaintiff's objections to the VMS regulation. Based on this ruling, NMFS is seeking to reinstate OMB approval for this information collection as required by the Paperwork Reduction Act.

If approved, automatic position reports would be submitted on an hourly basis whenever the vessel is at sea. The information would aid in the enforcement of fishery regulations and could allow for delayed offloading after a closure.

Vessel operators would also be required to follow an equipment installation checklist and submit it to NMFS. The checklist provides information on the hardware and communications service selected by each vessel. NMFS would use the returned checklists to ensure that position reports are received and to aid NMFS in troubleshooting problems.

II. Method of Collection

Checklists would be submitted in paper form. Position reports would be automatically sent electronically by the vessel monitoring system units.
