SUPPLEMENTARY INFORMATION: The Commission has received correspondence from Snow Glow® Inc. requesting that the Commission issue a rule prescribing performance standards for auxiliary hazard lighting systems on snowmobiles. The petitioner asserts that snowmobiles without such auxiliary hazard lighting systems pose an increased risk of collision between snowmobiles and serious injury or death to the operator of either snowmobile involved.

The petitioner maintains that auxiliary hazard lighting systems to reduce or eliminate this risk must exhibit the following characteristics: (1) Have an energy power source separate from the main power source of the snowmobile; (2) operate for a minimum of 40 hours at 0 degrees Fahrenheit and function in temperatures of minus 30 degrees Fahrenheit or colder; (3) have an on-off switch that is separate from the main electrical system; (4) emit yellow light from the front of the snowmobile and red from the rear; and (5) have a flashing display visible in unobstructed darkness from at least one half mile distance, from the front and rear of the snowmobile.

The Commission is docketing the correspondence as a petition under provisions of the Consumer Product Safety Act (CPSA), 15 U.S.C. 2051–2084.

Interested parties may obtain a copy of the petition by writing or calling the Office of the Secretary, Consumer

Product Safety Commission, Washington, DC 20207; telephone (301) 504–0800. The petition is available on the CPSC website at www.cpsc.gov.
