ACTION: Notice of availability; extension of public comment period.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are extending the public comment period on a draft environmental assessment (DEA) for an application for the programmatic take of golden eagles. The DEA evaluates alternatives for the application we have received from West Butte Wind Power, LLC, for programmatic permit for the take of golden eagles. If issued, the permit would be the first programmatic permit issued under our new permitting regulations under the Bald and Golden Eagle Protection Act (BGEPA). We announced receipt of the application and the availability of the DEA in our January 3, 2012, **Federal Register** notice, which also opened the 30-day public comment period. If you have previously submitted comments, please do not resubmit them, because we have already incorporated them in the public records and will fully consider them in our final decision.

DATES: To ensure consideration, please send your written comments by February 17, 2012.

ADDRESSES: You may download a copy of the DEA on the Internet at <http://www.fws.gov/pacific/migratorybirds/nepa.html>. Alternatively, you may use one of the methods below to request

hard copies or a CD-ROM of the documents. Please specify the “DEA for the West Butte Wind Project” on all correspondence.

SUPPLEMENTARY INFORMATION:

Introduction

The U.S. Fish and Wildlife Service is considering an application under the Bald and Golden Eagle Protection Act (16 U.S.C. 668a-d; BGEPA) for a programmatic golden eagle (*Aquila chrysaetos*) take permit from West Butte Wind Power, LLC. The company plans to develop the West Butte wind-power project in central Oregon, and there is a risk of eagle fatalities as a result of the operation of this facility. The application includes an avian and bat protection plan combined with an eagle conservation plan that describes actions taken and proposed future actions to avoid, minimize, and mitigate adverse effects on eagles. The eagle conservation plan was developed in collaboration with the Service.

The Draft Environmental Assessment (DEA) analyzes the alternatives associated with this permit application in light of our BGEPA permitting regulations in the Code of Federal Regulations (CFR) at 50 CFR 22.26. If

the results of this analysis lead us to issue this permit, it will be the first programmatic permit issued under these new regulations, as well as the first eagle take permit issued to a wind-energy company.

Background

BGEPA allows us to authorize bald eagle and golden eagle programmatic take (take that is recurring, is not caused solely by indirect effects, and that occurs over the long term or in a location or locations that cannot be specifically identified). Such take must be incidental to actions that are otherwise lawful. BGEPA's implementing regulations define “take” as “to pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, destroy, molest, or disturb individuals, their nests and eggs” (50 CFR 22.3); and “disturb” is further defined as “to agitate or bother a bald or golden eagle to a degree that causes ... injury to an eagle, ... a decrease in its productivity, ... or nest abandonment” (50 CFR 22.3). The West Butte Wind Project potentially will result in one or more recurring eagle mortalities over the life of the project, so the appropriate type of take permit is the programmatic permit under 50 CFR 22.26.

To obtain a programmatic permit under BGEPA and 50 CFR 22.26, the applicant must (1) avoid and minimize take to the maximum extent achievable; (2) conduct adequate monitoring to determine effects; (3) offset through compensatory mitigation any remaining take, such that the net effect on the eagle population is, at a minimum, no change for eagle management populations that cannot sustain additional mortality; and (4) ensure that the direct and indirect effects of the take and required mitigation, together with the cumulative effects of other permitted take and additional factors affecting eagle populations, are compatible with the preservation of bald eagles and golden eagles.

Applicant's Proposal

The 104-megawatt (MW) project is to be built in Crook and Deschutes Counties, Oregon. As a result of monitoring studies conducted on the proposed project site, the applicant considers the use of the site by eagles to be low, and has requested in their application a permit for the legal take of
