II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized below.

1. *The title of the information collection:* Part 40 of title 10 of the *Code of Federal Regulations* (10 CFR),

“Domestic Licensing of Source Material.”

2. *OMB approval number:* 3150-0020.

3. *Type of submission:* Revision.

4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* Reports required under 10 CFR part 40 are collected and evaluated on a continuing basis as events occur.

There is a one-time submittal of information to receive a license. Renewal applications need to be submitted every 15 to 40 years. Information in previous applications may be referenced without being resubmitted. In addition, recordkeeping must be performed on an on-going basis.

6. *Who will be required or asked to respond:* Applicants for and holders of NRC licenses authorizing the receipt, possession, use, or transfer of radioactive source material.

7. *The estimated number of annual responses:* 1,341.

8. *The estimated number of annual respondents:* 582 (72 NRC licensees + 510 Agreement State licensees).

10. *Abstract:* The NRC regulations in 10 CFR part 40 establish procedures and criteria for the issuance of licenses to receive title to, receive, possess, use, transfer, or deliver source and byproduct material. The application, reporting, recordkeeping, and third-party notification requirements are necessary to permit the NRC to make a determination as to whether the possession, use, and transfer of source and byproduct material is in conformance with the Commission's regulations for protection of public health and safety.

III. Specific Requests for Comments

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the estimate of the burden of the information collection accurate?
