

than 92 (with half-lives greater than twenty years), in concentrations greater than 100 nanocuries of alpha-emitting TRU isotopes per gram of waste. Much of the existing TRU waste consists of items contaminated during the production of nuclear weapons, such as rags, equipment, tools, and sludges.

On May 13, 1998, EPA announced its final compliance certification decision to the Secretary of Energy (published May 18, 1998, 63 FR 27354). This decision stated that the WIPP will comply with EPA's radioactive waste disposal regulations at 40 CFR part 191, subparts B and C.

The final WIPP certification decision includes conditions that (1) prohibit shipment of TRU waste for disposal at WIPP from any site other than the Los Alamos National Laboratory (LANL) until the EPA determines that the site has established and executed a quality assurance program, in accordance with §§ 194.22(a)(2)(i), 194.24(c)(3), and 194.24(c)(5) for waste characterization activities and assumptions (Condition 2 of appendix A to 40 CFR part 194); and (2) prohibit shipment of TRU waste for disposal at WIPP from any site other than LANL until the EPA has approved the procedures developed to comply with the waste characterization requirements of § 194.22(c)(4) (Condition 3 of appendix A to 40 CFR part 194). The EPA's approval process for waste generator sites is described in § 194.8. As part of EPA's decision-making process, the DOE is required to submit to EPA appropriate documentation of quality assurance and waste characterization programs at each DOE waste generator site seeking approval for shipment of TRU radioactive waste to WIPP. In accordance with § 194.8, EPA will place such documentation in the official Air Docket in Washington, DC, and informational dockets in the State of New Mexico for public review and comment.

EPA will perform an inspection of the TRU waste characterization activities performed by the DOE's Central Characterization Project (CCP) staff at the Argonne National Laboratory-East (ANL-E) in accordance with Condition 3 of the WIPP certification. We will evaluate the adequacy, implementation, and effectiveness of the CCP technical activities contracted by the ANL-E for characterization of the disposal of retrievably-stored homogeneous solid waste at the WIPP. We also will evaluate DOE's corrective action(s) responding to the EPA finding (identified during the September 2002 inspection) related to the implementation of a procedure to compile acceptable knowledge. This

finding resulted in the denial of DOE's request for approving the CCP-characterized TRU debris waste at ANL. Therefore, until EPA is satisfied with the corrective action taken to resolve this finding ANL-E cannot ship TRU debris waste for disposal at WIPP. The overall program adequacy and effectiveness of CCP/ANL-E documents will be based on the following DOE-provided documents: (1) CCP-PO-001—Revision 4, 5/31/02—CCP Transuranic Waste Characterization Quality Assurance Project Plan and (2) CCP-PO-002—Revision 4, 5/17/02—CCP Transuranic Waste Certification Plan. EPA has placed these DOE-provided documents pertinent to the ANL-E inspection in the public docket described in **ADDRESSES**. The documents are included in item II-A2-40 in Docket A-98-49. In accordance with 40 CFR 194.8, EPA is providing the public 30 days to comment on these documents. The inspection is scheduled to take place the week of February 10, 2003.

EPA will inspect the following technical elements for characterizing retrievably-stored TRU debris and solid waste: data validation and verification, acceptable knowledge, nondestructive assay (NDA-WIT and APNEA), Digital Radiography/Computed Tomography, visual examination, and data tracking and reporting via the WIPP Waste Information System.

If EPA determines as a result of the inspection that the proposed CCP waste characterization processes and programs used at ANL-E adequately control the characterization of transuranic waste, we will notify DOE by letter and place the letter in the official Air Docket in Washington, DC, as well as in the informational docket locations in New Mexico. A letter of approval will allow DOE to ship transuranic waste from ANL-E to the WIPP. The EPA will not make a determination of compliance prior to the inspection or before the 30-day comment period has closed.

Information on the certification decision is filed in the official EPA Air Docket, Docket No. A-93-02 and is available for review in Washington, DC, and at three EPA WIPP informational docket locations in New Mexico. The dockets in New Mexico contain only major items from the official Air Docket in Washington, DC, plus those documents added to the official Air Docket since the October 1992 enactment of the WIPP LWA.

Dated: January 24, 2003.

Robert Brenner,

Acting Assistant Administrator for Air and Radiation.

BILLING CODE 6560-50-P

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-P-7619]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Proposed rule.

SUMMARY: Technical information or comments are requested on the proposed Base (1% annual-chance) Flood Elevations (BFEs) and proposed BFE modifications for the communities listed below. The BFEs and modified BFEs are the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The comment period is ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: The proposed BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: Michael M. Grimm, Acting Chief, Hazard Study Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street, SW., Washington, DC 20472, (202) 646-2878 or (e-mail) michael.grimm@fema.gov.

SUPPLEMENTARY INFORMATION: FEMA proposes to make determinations of BFEs and modified BFEs for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more

stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

National Environmental Policy Act. This proposed rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act. The Administrator for Federal Insurance and Mitigation Administration certifies that

this proposed rule is exempt from the requirements of the Regulatory Flexibility Act because proposed or modified BFEs are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and are required to establish and maintain community eligibility in the NFIP. No regulatory flexibility analysis has been prepared.

Regulatory Classification. This proposed rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism. This proposed rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform. This proposed rule meets the

applicable standards of section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, flood insurance, reporting and record keeping requirements.

Accordingly, 44 CFR Part 67 is proposed to be amended as follows:

PART 67—[AMENDED]

1. The authority citation for Part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.4 Proposed flood elevation determination.

2. The tables published under the authority of § 67.4 are proposed to be amended as follows:

Source of flooding and location of referenced elevation	*Elevation in feet (NGVD)		Communities affected
	Existing	Modified	
Grand Lake O' the Cherokees Entire shoreline	None	*756	Town of Grand Lake Towne.
Unnamed Tributary to Spavinaw Creek approximately 750 feet upstream of the confluence with Spavinaw Creek.	None	*637	Town of Spavinaw.
Neosho River/Lake Hudson Entire shoreline	None	*637	Town of Strang.

*National Geodetic Vertical Datum

Town of Grand Lake Towne

Maps are available for inspection at the Town Hall, Grand Lake Towne, Oklahoma.

Send comments to The Honorable Earl Hart, Mayor, Grand Lake Towne, P.O. Box 398, Grand Lake Towne, Oklahoma 74349.

Town of Spavinaw

Maps are available for inspection at the Town Hall, 215 Lake Avenue, Spavinaw, Oklahoma.

Send comments to The Honorable Allan Sutton, Mayor, Town of Spavinaw, P.O. Box 196, Spavinaw, Oklahoma 74366.

Town of Strang

Maps are available for inspection at the Town Hall, Strang, Oklahoma.

Send comments to The Honorable Steve Long, Mayor, Town of Strang, P.O. Box 196, Strang, Oklahoma 74366.

(Catalog of Federal Domestic Assistance No. 83.100, "Flood Insurance.")

Dated: January 21, 2003.

Anthony S. Lowe,

Administrator, Federal Insurance and Mitigation Administration.
