SUPPLEMENTARY INFORMATION: On July 8, 2010, notice was published in the **Federal Register** (75 FR 39206) that a request for an amendment to Permit No. 555-1870-01 to conduct research on harbor seals (*Phoca vitulina*) had been submitted by the above-named applicant. The amendment has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The permit amendment (Permit No. 555-1870-02) authorizes an increase in the number of subadult harbor seals taken annually in California by capture, sedation, tagging, and sampling from 40 seals (20 males and 20 females) to 70 seals (35 males and 35 females). Also, a pilot study is authorized to bring up to six seals into temporary captivity to assess the efficacy of a modified sedation and suture protocol for implantation of subcutaneous radio tags. If effective, the modified protocols will be implemented in the field. The permit expires April 15, 2012.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.
