BILLING CODE 4210-72-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Information Collection Renewal to be Submitted to the Office of Management and Budget (OMB) for Approval Under the Paperwork Reduction Act; Experimental Populations; Endangered and Threatened Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: The collection of information described below will be submitted to OMB for approval under the provisions of the Paperwork Reduction Act of 1995. Copies of specific information collection requirements, related forms and explanatory material may be obtained by contacting the Information Collection Clearance Officer of the U.S. Fish and Wildlife Service at the address and/or phone numbers listed below.

DATES: Consideration will be given to all comments received on or before September 27, 2004.

ADDRESSES: Send your comments on the information collection requirement via mail to the Information Collection Clearance Officer, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Mail Stop 222-ARLSQ, Arlington, Virginia 22203; or via fax at (703) 358-2269; or via e-mail at Hope_Grey@fws.gov.

FOR FURTHER INFORMATION CONTACT: To request a copy of the proposed

information collection requirement, related forms, or explanatory material, contact Hope Grey by telephone at (703) 358-2482 or by e-mail at Hope_Grey@fws.gov. You may also contact Elena Babij, Endangered Species Program, by telephone at (703) 358-2061 or by e-mail at Eleanora_Babij@fws.gov.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget (OMB) regulations at 5 CFR 1320, which implement provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d)). The U.S. Fish and Wildlife Service (Service or we) plans to submit a request to OMB to renew its existing approval of the collection of information for Experimental Populations, Endangered and Threatened Species, which expires on October 31, 2004. We are requesting a 3-year term of approval for this information collection activity.

Federal agencies may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this collection of information is 1018-0095.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology; and (4) ways to minimize the burden of the collection of information on those who are to respond. The information collections in this program will not be part of a system

of records covered by the Privacy Act (5 U.S.C. 552(a)).

Experimental populations established under section 10(j) of the Endangered Species Act of 1973, as amended (ESA), require information collection and reporting to the Service. Section 9 of the ESA describes prohibited acts involving threatened or endangered species (16 U.S.C. section 1538 (a)(1)(B)). There are three major categories of information collected under the already issued experimental population rules. To date, these categories have encompassed information relating to: (1) The general taking or removal of individuals of an experimental population, (2) the authorized taking of individuals related to reports of depredation on livestock or pets caused by individuals that are part of an experimental population, and (3) the collection of specimens or the recovery of dead animals that are part of an experimental population. These three categories have adequately described the types of information needed to evaluate the efficacy of the program and are expected to continue to accurately describe activities under the program.

Because individuals of designated experimental populations for species listed as threatened or endangered under the ESA are categorically protected, documentation of human-related mortalities, recovery of dead specimens and other types of take related to the status of experimental populations is important to the Service in order to monitor the success of reintroduction efforts, and recovery efforts in general. In order to minimize potential conflict with humans which could undermine recovery efforts, livestock depredations connected with experimental populations of listed species require prompt attention for purposes of determining the location, timing, and nature of the predatory behavior involved, accurate determination of the species responsible for a livestock kill, and the timely application of necessary control measures. The Service, in cooperation with the United States Department of Agriculture/Animal Plant Health
