

River Harvest Module (NMFS 2014a) as Appendix G.

The Public Draft Recovery Plan

The Proposed Plan contains biological background and contextual information that includes description of the ESU, the planning area, and the context of the plan's development. It presents relevant information on ESU structure, guidelines for assessing salmonid population and ESU status, and a brief summary of Interior Columbia Technical Recovery Team products on population structure and species status. It also presents NMFS' proposed biological viability criteria and threats criteria for delisting.

As described in Chapter 2 of the Proposed Plan, the historical Snake River fall Chinook salmon ESU consisted of two populations. The population above the Hells Canyon Dam Complex is extirpated, leaving only one extant population—the Lower Mainstem Snake River population. An ESU with a single population would be at greater extinction risk than an ESU with multiple populations. This is a key consideration in the proposed Snake River fall Chinook salmon biological viability criteria, since there is more than one possible scenario for achieving the criteria. The proposed viability criteria include two possible scenarios and a placeholder for developing additional scenarios that would be consistent with delisting. Scenario A focuses on achieving ESA delisting with two populations (*i.e.*, the extant Lower Mainstem Snake River population and a recovered Middle Snake population above the Hells Canyon Complex). Scenario B illustrates a single-population pathway to delisting. The placeholder scenario describes a framework under which additional single-population scenarios could be developed that would involve developing natural production emphasis areas that would have a low percentage of hatchery-origin spawners. NMFS is interested in comments on how such additional scenarios might be developed, potentially for inclusion in the final recovery plan.

The Proposed Plan also describes specific information on the following: current status of Snake River Fall Chinook Salmon; limiting factors and threats throughout the life cycle that have contributed to the species decline; recovery strategies and actions addressing these limiting factors and threats; and a proposed research, monitoring, and evaluation program for adaptive management. For recovery actions, the Proposed Plan includes a table summarizing each proposed

action, life stage affected, estimated costs, timing, and potential implementing entities. It also describes how implementation, prioritization of actions, and adaptive management will proceed. The Proposed Plan also summarizes time and costs (Chapter 9) required to implement recovery actions. In some cases, costs of implementing actions could not be determined at this time and NMFS is interested in additional information regarding scale, scope, and costs of these actions. We are also particularly interested in comments on establishing appropriate forums to coordinate implementation of the recovery plan.

Public Comments Solicited

We are soliciting written comments on the Proposed Plan. All substantive comments received by the date specified above will be considered and incorporated, as appropriate, prior to our decision whether to approve the plan. While we invite comments on all aspects of the Proposed Plan, we are particularly interested in comments on developing specific scenarios to address the placeholder recovery scenario, comments on the cost of recovery actions for which we have not yet determined implementation costs, and comments on establishing an appropriate implementation forum for the plan. We will issue a news release announcing the adoption and availability of the final plan. We will post on the NMFS West Coast Region Web site (www.wcr.noaa.gov) a summary of, and responses to, the comments received, along with electronic copies of the final plan and its appendices.

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID USA–2015–HQ–0049]

Proposed Collection; Comment Request

AGENCY: Office of the Administrative Assistant to the Secretary of the Army, (OAA–AAHS), DoD.

ACTION: Notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995*, the Office of the Administrative Assistant to the Secretary of the Army announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by February 16, 2016.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the instructions for submitting comments.

- **Mail:** Department of Defense, Office of the Deputy Chief Management Officer, Directorate of Oversight and Compliance, Regulatory and Audit Matters Office, 9010 Defense Pentagon, Washington, DC 20301–9010.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public
