SUPPLEMENTARY INFORMATION:

I. Background

The Committee advises the Secretary on the necessary elements of a comprehensive policy approach to supply chain competitiveness designed to support national economic competitiveness and U.S. export growth, encourage innovation, facilitate the movement of goods, and improve the competitiveness of U.S. supply chains for goods and services in the domestic and global economy; and on regulatory policies and programs and investment priorities that affect the competitiveness of U.S. supply chains. The Committee provides detailed policy and technical advice, information, and recommendations to the Secretary regarding:

(1) National, state, or local factors in trade programs and policies that affect the efficient domestic and international operation and competitiveness of U.S. global supply chains from point of origin to destination;

(2) elements of national policies affecting the movement of goods, infrastructure, investment, and regulatory factors that affect supply chain competitiveness and sustainability; and

(3) information and data systems to generate metrics that can be used to

quantify and improve supply chain performance.

The Department intends for the Committee to focus on the current challenges facing the supply chain during this charter term.

II. Membership
