

be deemed finally accepted and the Final Order issued on the 16th day.

21. Red Rock and Blackjack have recently become members of the American Fireworks Standards Laboratory (AFSL). Based on current data, the Commission staff believes that fireworks imported under the AFSL testing and certification program are more likely to comply with the Commission's Fireworks Regulations than non-AFSL fireworks are. Accordingly, the Commission will not pursue FHSA violations against Red Rock and Blackjack for those fireworks products legitimately tested and certified by AFSL as complying with the Commission's Fireworks Regulations, as the AFSL program is currently structured and administered. However, the Commission staff will continue to monitor the AFSL program. If the Commission staff determines that the AFSL program does not adequately assure compliance with the fireworks regulations, it will notify Red Rock and Blackjack in writing. After providing such written notice to Red Rock and Blackjack, the Commission staff will have the enforcement discretion to pursue violations of the FHSA and the Commission's Fireworks Regulations against Red Rock and Blackjack for AFSL tested fireworks products received and/or imported by Red Rock and Blackjack after such notification date. The Commission staff's determination on the adequacy of the AFSL testing and certification program is neither reviewable nor subject to challenge by Red Rock and Blackjack nor provides a basis for Red Rock and Blackjack to challenge this Agreement.

22. This Settlement Agreement may be used in interpreting the Order. Agreements, understandings, representations, or interpretations apart from those contained in this Settlement Agreement and incorporated Order may not be used to vary or contradict its terms.

23. The provisions of this Settlement Agreement and Order shall apply to Red Rock and Blackjack and each of their successors and assigns.

24. Upon final acceptance of this Agreement, the Commission shall issue the attached Final Order.

Respondent's Red Rock Trading Company, Inc. and Blackjack Fireworks, Inc.

Dated: March 13, 2000.

Tim McCoy,

President, Red Rock Trading Company, Inc. and Blackjack Fireworks, Inc., 6000 South Eastern, Suite 11E, Las Vegas, NV 89119.

Commission Staff

Alan H. Schoem,

Assistant Executive Director, Consumer Product Safety Commission, Office of Compliance, Washington, D.C. 20207-0001.

Eric L. Stone,

Director, Legal Division, Office of Compliance.

Dated: March 16, 2000.

Dennis C. Kacoyanis,

Trial Attorney, Legal Division, Office of Compliance.

Order

Upon consideration of the Settlement Agreement entered into between Respondents Red Rock Trading Company, Inc., a corporation, Blackjack Fireworks, Inc., a corporation, and the staff of the Consumer Product Safety Commission; and the Commission having jurisdiction over the subject matter and Red Rock Trading Company, Inc. and Blackjack Fireworks, Inc.; and it appearing that the Settlement Agreement and Order is in the public interest, it is

Ordered, that the Settlement Agreement be and hereby is accepted; and it is

Further ordered, that upon final acceptance of the Settlement Agreement and Order, Red Rock Trading Company, Inc. and Blackjack Fireworks, Inc. shall pay a civil penalty in the amount of ninety thousand and 00/100 dollars (\$90,000.00) in three (3) payments. The first payment of forty thousand and 00/100 dollars (\$40,000.00) shall be due within twenty (20) days after service upon Red Rock Trading Company, Inc. and Blackjack Fireworks, Inc. of the Final Order of the Commission accepting the Settlement Agreement (hereinafter, the "anniversary date"). The second payment of twenty-five thousand and 00/100 dollars (\$25,000.00) shall be paid on or before August 1, 2000. The third payment of twenty-five thousand and 00/100 dollars (\$25,000.00) shall be made within one year of the anniversary date. Upon the failure of Red Rock Trading Company, Inc. and Blackjack Fireworks, Inc. to make a payment or upon Red Rock Trading Company, Inc. and Blackjack Fireworks, Inc. making a late payment (a) the entire amount of the civil penalty shall be due and payable, and (b) interest on the outstanding balance shall accrue and be paid at the federal legal rate of interest under the provisions of 28 U.S.C. 1961(a) and (c).

Provisionally accepted and Provisional Order issued on the 5th day of June, 2000.

By order of the Commission.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

DEPARTMENT OF DEFENSE

Department of the Army

Reissuance of MFTRP No. 1A as MFTRP No. 1B, Including PowerTrack Requirements

AGENCY: Military Traffic Management Command, DoD.

ACTION: Notice.

SUMMARY: The Military Traffic Management Command (MTMC), as the Department of Defense (DoD) Traffic Manager for surface and surface intermodal traffic management services, hereby cancels MTMC Freight Traffic Rules Publication (MFTRP) No. 1A in its entirety and replaces it with MFTRP No. 1B, effective September 30, 2000. The actual text of the 1B will be available on the Internet at MTMC's website at www.mtmc.army.mil by clicking in succession on: (1) Transportation Services, (2) Freight Logistics, (3) Freight Traffic Rules Publications and then clicking on the appropriate box indicating the 1B. In conjunction with the replacement of the 1A with the 1B, use of the PowerTrack automated billing and payment system will become mandatory on September 30, 2000 for all DoD freight shipped in accordance with the 1B motor rules publication. Specifically, motor carriers wishing to transport DoD freight effective September 30, 2000 must have a signed agreement with US Bank and be PowerTrack certified to be eligible to pick up shipments on or after that date. The 1B is being issued by MTMC Headquarters in Alexandria, Virginia; however, responsibility for the publication after its original issuance will pass from MTMC Headquarters to MTMC's Deployment Support Command at Fort Eustis, Virginia.

DATES: MFTRP No. 1A is cancelled and MFTRP No. 1B is effective September 30, 2000.

ADDRESSES:

(Until September 30, 2000)

Headquarters, Military Traffic Management Command, ATTN: MTOP-MRM, Room 10N-07, Hoffman II Building, 200 Stovall Street, Alexandria, VA 22332-5000, attn: Jerome Colton, e-mail:

coltonj@mtmc.army.mil
(After September 30, 2000)
MTMC Deployment Support
Command, attn: Steve Lord, Room
201, Bldg. 664 Sheppard Place, Fort
Eustis, VA 23604, e-mail:
lords@mtmc.army.mil

FOR FURTHER INFORMATION CONTACT: For additional information contact Mr. Jerome Colton at 703-428-2324.

SUPPLEMENTARY INFORMATION: This change is effective on September 30, 2000. A notice proposing this change was published in the **Federal Register**, Vol. 64, No. 245, page 71742, Wednesday, December 22, 1999. In response to this notice, a total of three (3) letters (two from carriers and one from a carrier association) were received during the 60-day comment period. The synopsis of the comments and MTMC's responses appear below. Comments pertaining to material which did not change from the 1A from the 1B will be referenced but not synopsized, and will be followed by the standard response "There has been no substantive change from the 1A to the 1B". The comments and responses are as follows:

Comment: Electronic Commerce/Electronic Data Interchange and PowerTrack (Items 16 and 20). Will there be ample time to implement these programs prior to their becoming mandatory? When will these programs be mandatory? Some aspects of these programs impose an unfair burden on carriers.

Response:

(a) PowerTrack and other automation programs are required by the Secretary of Defense under Management Reform Memorandum Number 15.

(b) Motor carriers wishing to transport DoD motor freight must have a signed agreement and be PowerTrack certified by September 30, 2000.

(c) These initiatives were publicized at various times in the past year including announcements at workshops and symposia and carriers have had ample time to prepare. Item 20 of the 1B draft text, referenced in the **Federal Register** announcement of and posted on MTMC's website since December 22, 1999 stated: "Implementation of PowerTrack began in 1999, and is expected to become mandatory in September 2000 * * *, at which time it will become the exclusive mechanism for payment of freight bills by DoD. Carriers are therefore strongly encouraged to become PowerTrack-certified as soon as possible." Qualified motor carriers still not PowerTrack capable who wish to continue carrying DoD freight after September 30, 2000 are urged to contact US Bank immediately

at 1010 South Seventh Street, Minneapolis, MN 55415, Tel: 612-973-6597. Additional information on PowerTrack is available at www.usbank.com/powertrack.

(d) Over three hundred MTMC-qualified motor carriers already have a signed PowerTrack agreement with US Bank.

(e) Although MTMC is not privy to the individual PowerTrack agreement between US Bank and each carrier, it is our understanding that the fees charged are well within industry norms and lower than those charged by factoring companies. This is in part due to the elimination of paper from the billing process and the benefits of automation, which has also resulted in carriers being paid in a fraction of the time it has taken in a non-automated environment. Overall response to PowerTrack has been overwhelmingly positive.

Comment: After-the-fact negotiations (Items 18 and 21).

Response: There has been no substantive change from the 1A and 1B.

Comment: GBL Correction Notices (Item 19). The thirty-day time limit for carriers to request a Correction Notice is restrictive, unfair, and unrealistic, and not in the spirit of related statutes which provide for a 180-day time limit.

Response: In accordance with the implementation of PowerTrack which will eliminate GBLs, the new PowerTrack procedures will come into effect vice GBL Correction Notices.

Comment: Alternation—Item 60. (1) Transportation Officers (TOs) should be permitted to authorize a non-alternating point-to-point tender in special cases or by specifying same on the GBL; (2) Sixteen point-to-point exceptions in PowerTrack territorial tenders will not be sufficient; (3) Alternation to the lowest rate will result in service degradation, as certain shipping lanes have special requirements.

Response: (1) Both the automated environment and necessary administrative procedures make it unfeasible to allow TOs to authorize non-alternating point-to-point tenders. (2) The 1B has increased point-to-point exceptions from six to sixteen. Sixteen exceptions is more than sufficient for virtually all situations, as confirmed by both experience and multiple informal conversations and meetings with carriers. If ever a rare case arises where this is insufficient, that one tender can be restructured or divided using various options, such as reducing the size of the territory covered. (3) Shipping lanes with special requirements should be listed as one of the exceptions to the territorial rate.

Comment: Customs or In Bond Freight (Item 80). Why is this deleted?

Response: This Item is deleted because it is virtually never used. Customs fees are rarely, if ever, applied to DoD shipments. DoD does not ship items on a COD basis.

Comment: Detention (Item 85).

Response: There has been no substantive change from the 1A to the 1B.

Comment: Expedited Service (Item 110).

Response: There has been no substantive change from the 1A to 1B. Please note that the redundant phrase "in addition to all other transportation charges" which appeared throughout the 1A in describing various accessorial services has been deleted in favor of a single sentence to be inserted in Item 13 stating that accessorial charges shall be paid in addition to line haul rates.

Comment: Handling of Freight at Positions Not Immediately Adjacent to Vehicle (Item 125). Why is this rule eliminated? There is no justification for converting this service, for which a price can legitimately be set, to an after-the-fact negotiation.

Response: Item 125 has been restored.

Comment: Routing—Items 200, 300, 400. (1) Some shipments and/or routes require mileages in excess of the applicable DTOD module. (2) Implementation of the 1B should be held up while a study of DTOD's accuracy is conducted. (3) A MTMC letter authorizing payment on these extra miles should be (but has not been) incorporated into the 1B.

Response: This issue will be largely eliminated as the majority of such cases arise for Overdimensional/Overweight (ODOW) Shipments, which will become moot under the 1B, which requires that ODOW shipments be handled under Spot Bid (under which mileage calculations do not exist) except in special circumstances (see Item 400). However, for those few remaining cases where such issues will continue to arise:

(1) It is a well-established principle that a discrepancy between actual mileage and the mileage listed by a Governing Mileage Guide (GMG) is resolved in favor of the GMG. Any discrepancy or anomaly in a particular lane should be reported to the GMG manager for correction.

(2) DTOD is currently in effect under the 1A, so DTOD as such is not a 1A to 1B issue.

(3) The new rule reflects both commercial transportation practice and the realities of an automated environment such as PowerTrack whereby the GMG is the sole mileage authority. The relevant rule in the 1A

(which was so confusing and impractical that the cited letter has to be written to interpret it) was changed because it: (a) Is not feasible in a non-paper environment, (b) does not correspond to commercial practice of using a GMG as the sole arbiter of mileage, and (c) resulted in an unrealistic administrative burden calculating and reconciling mileages in each and every state through which a shipment passed, and typically involved adding mileages from one state line to the next.

Comment: Towaway Service (Item 228) This new Item does not fairly divide liability issues between shipper and carrier; instead all liabilities are imposed on the carrier.

Response: We have adopted the language "or other failure to properly maintain * * *". We have considered the additional request that DoD assume liability, including attorney fees, for third-party claims resulting from Towaway Service. We cannot assume this liability and do not believe that it would be equitable to do so. Each claim, if any, would have to be decided on a case-by-case basis.

Comment: Weight Verification (Item 250).

Response: There has been no substantive change from the 1A to the 1B.

Comment: Dromedary Services (old Items 325 and 327). Why are these Items eliminated? While much of the information has been incorporated elsewhere (e.g. Item 105), some essential information appears nowhere in the 1B. 5000 and 10000 pound minimum charges for regular and 410 dromedary shipments, respectively, have been eliminated for Dual Driver and Protective Security accessorial, and for White Phosphorus and similar commodities.

Response: These provisions have not been eliminated for the two accessories cited; the 1B includes them in Item 35, para 1n, Item 40, para 2b, and Item 105, para c. The provisions for white phosphorus and similar commodities have been restored, and now appear in Item 328, paragraph 2.

Regulatory Flexibility Act: This change is not considered rule making within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601-612.

Paperwork Reduction Act: The Paperwork Reduction Act, 44 U.S.C. 3051 *et seq.*, does not apply because no information collection requirement or recordskeeping responsibilities are

imposed on offerors, contractors, or members of the public.

Thomas Hicks,

Deputy Chief of Staff for Operations.

BILLING CODE 3710-08-U

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Notice of Intent To Prepare an Environmental Assessment for Proposed Authorization of an Ohio River Ecosystem Restoration Program

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice.

SUMMARY: This Notice of Intent is an amendment to the Department of the Army, Corps of Engineers, "Notice of Intent to Prepare an Environmental Impact Statement for the Ohio River Main Stem System Study," published in **Federal Register**, volume 63, number 203 page 56165, on Wednesday, October 21, 1998.

The U.S. Army Corps of Engineers, in partnership with the U.S. Fish and Wildlife Service, and resource agencies of states bordering the Ohio River, is currently evaluating various ecosystem restoration opportunities for the Ohio River corridor. The proposed action is being conducted under the authority of United States Senate, Committee on Public Works resolution dated May 16, 1955; and, United States House of Representatives, Committee on Public Works and Transportation resolution dated March 11, 1982.

The Corps of Engineers will prepare and circulate a Decision Document and integrated Environmental Assessment which will announce an intention to prepare a Finding of No Significant Impact (FONSI), if appropriate. Public review of this report is scheduled to begin in July 2000. Interested parties are encouraged to send written comments or requests for information, regarding the proposed study process, to the point-of-contact below. All comments and information requests should be postmarked no later than 30 days after this Notice of Intent is published.

FOR FURTHER INFORMATION CONTACT:

Please address questions regarding this notice to Mr. Michael Q. Holley, PM-C, Louisville District, Corps of Engineers, P.O. Box 59, Louisville, Kentucky 40201-0059, Telephone: (502) 582-5152.

SUPPLEMENTARY INFORMATION:

a. Reference **Federal Register**, volume 63, number 203, dated Wednesday, October 21, 1998. Within that document, the Corps of Engineers gave notice of intent to prepare an Environmental Impact Statement for the Ohio River Main Stem System Study.

This study is designed to capture foreseeable maintenance, rehabilitation and new construction needs for the navigation infrastructure of the Ohio River until the year 2060 and to investigate habitat restoration options along the main stem Ohio River. The study would also identify those actions which are economically justified and environmentally prudent.

b. As part of the Ohio River Main Stem System Study, an environmental team, consisting of personnel from the U.S. Fish and Wildlife Service, the natural resource agencies of six states, and the Corps of Engineers was formed. This team investigated opportunities and established general goals for ecosystem restoration projects. During the initial study process, resource officials of states bordering the Ohio River, identified over 250 site-specific environmental projects for further analysis. Because of the considerable interest, the Corps of Engineers, with support from state officials, initiated a study report for proposed authorization of a cost shared ecosystem restoration program for the Ohio River.

c. The Corps of Engineers originally intended to study ecosystem restoration, within the entire Ohio River Main Stem System Study, as indicated in the Supplemental Information of **Federal Register**, volume 63, number 203. However, an ecosystem restoration program does not relate directly to navigational improvements and can stand independent of those improvements. It was therefore determined that an ecosystem restoration program would be developed as a separate product of the Ohio River Main Stem System Study.

d. The primary purpose of the proposed ecosystem restoration program is to restore and protect aquatic, wetland, floodplain and riparian habitats that would benefit from such a program for the Ohio River watershed. These goals would be accomplished by means of erosion control, island restoration, bottomland reforestation, creation of aquatic habitat, and other generally accepted environmental measures. As a secondary objective, the program would preserve the historic and cultural resources of the Ohio River through implementation of various low cost educational and recreational amenities that would not detract from
