

Environmental education and partnerships will result in improved wildlife-dependent recreational opportunities. Cultural and historical resources, as well as federally listed species, will be protected.

For Lamesteer NWR, under Alternative A, the no action alternative, the Service would continue to manage the site as an easement refuge superimposed on privately owned lands to serve as a resting place for migratory birds while on migration. The Service would maintain the dam and spillway, including the funding of all maintenance costs. The landowner would continue to control access to the site, including all hunting access and other public uses.

Alternative B, the Service's proposed action, would relinquish the easement at Lamesteer NWR to the current landowners. The Service would divest its interest in the refuge.

Opportunities for public input also will be provided at a public meeting. Exact dates and times for these public meetings are yet to be determined, but will be announced via local media and a planning update. All information provided voluntarily by mail, phone, or at public meetings (e.g., names, addresses, letters of comment, input recorded during meetings) becomes part of the official public record. If requested under the Freedom of Information Act by a private citizen or organization, the Service may provide copies of such information. The environmental review of this project will be conducted in accordance with the requirements of the National Environmental Policy Act (NEPA) of 1969, as amended (42 U.S.C. 4321 *et seq.*); NEPA Regulations (40 CFR parts 1500–1508); other appropriate Federal laws and regulations; Executive Order 12996; the National Wildlife Refuge System Improvement Act of 1997; and Service policies and procedures for compliance with those laws and regulations.
