Explorer Pipeline Company; Notice of Amendment to Petition for Declaratory Order

Take notice that on May 17, 2012, pursuant to Rule 215 of the Commission's Rules of Practice and Procedure, 18 CFR 385.215 (2011), Explorer Pipeline Company (Explorer) filed an amendment to its March 23, 2012 Petition to the Federal Energy Regulatory Commission for a declaratory order approving (1) priority capacity and (2) the overall rate structure for Explorer's proposed diluent pipeline extension project (Diluent Extension Project). In its Petition, Explorer described the Diluent Extension Project as involving the construction of a new pipeline segment from Peotone, Illinois to Manhattan, Illinois, where Explorer's pipeline system will interconnect with Enbridge's Southern Lights pipeline. In light of recent industry developments, Explorer states in its amendment that it seeks to make the priority capacity and overall rate structure it requests in its Petition available to shippers who commit to a different interconnection project. CenterPoint Energy Gas Transmission Company, LLC; Notice of Request Under Blanket Authorization

Take notice that on May 22, 2012, CenterPoint Energy Gas Transmission Company, LLC (CenterPoint), 1111 Louisiana Street, Houston, Texas, pursuant to its blanket certificate issued in Docket Nos. CP82-384-000, et. al., filed an application in accordance to sections 157.210 and 157.217(b) of the Commission's Regulations under the Natural Gas Act (NGA) as amended, to replace compression facilities at the Ruston Storage Compressor Station located in Lincoln Parish, Louisiana, all as more fully set forth in the application, which is on file with the Commission and open to public inspection. The filing may also be viewed on the web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. The Ruston Storage Compressor Station (Ruston) was constructed in 1969 and consists of one 4,000 horsepower (hp) Worthington MLV-14 reciprocating compressor unit which was originally installed over 40 years ago. CenterPoint has determined that Ruston needs additional operating flexibility to dedicate compression directly to storage injection and since CenterPoint can no longer purchase replacement parts for the existing compressor unit, CenterPoint proposed to replace the Worthington unit with a 4,735 hp CAT unit, comprised of a skid-mounted control enclosure, fuel gas metering skid, and appurtenant facilities. The proposed replacement will (1) increase Line F's available year-round, firm capacity east of Ruston, from 147.4 MMcf/day to 162.5 MMcf/day; (2) increase Ruston's injection deliverability from 33 MMcf/day to 34.5 MMcf/day; and (3) increase Line F's available peak day capacity east of Ruston, from 286.4 MMcf/day to 291.3 MMcf/day. The proposed replacement will not result in any changes to the certificated parameters of the Ruston Storage Field. The estimated cost of the proposed project is \$13.9 million, which will be financed by available funds and/or short-term borrowings.

Any questions concerning this application may be directed to B. Michelle Willis, Manager, Regulatory and Compliance, CenterPoint Energy Gas Transmission Company, P.O. Box 21734, Shreveport, Louisiana 71151, (318) 429-3708, or email at Mitchelle.Willis@CenterPointEnergy.com.
