DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP15–7–000]

Dominion Transmission, Inc.; Notice of Intent To Prepare an Environmental Assessment for the Proposed Monroe to Cornwell Project and Request for Comments on Environmental Issues

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Monroe to Cornwell Project involving construction and operation of facilities by Dominion Transmission, Inc. (Dominion) in Doddridge, Wetzel, and Kanawha Counties in West Virginia. The Commission will use this EA in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the project. Your input will help the Commission staff determine what issues they need to evaluate in the EA. Please note that the scoping period will close on January 12, 2015.

You may submit comments in written form. Further details on how to submit written comments are in the Public Participation section of this notice. If you sent comments on this project to the Commission before the opening of this docket on October 22, 2014, you will need to file those comments in Docket No. CP15–7–000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the Commission approves the project, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with state law.

Dominion provided landowners with a fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" This fact sheet addresses a number of typically-asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is also available for viewing on the FERC Web site (www.ferc.gov).

Summary of the Proposed Project

According to Dominion, the Monroe to Cornwell Project would provide 205,000 dekatherms per day of firm transportation service in Ohio and West Virginia and increase supply reliability outside of the Marcellus and Utica production basins.

Specifically, the Monroe to Cornwell Project would consist of the installation of the following facilities, all located in West Virginia:

- An additional 12,552 horsepower of compression, one new gas cooler, one new filter separator, new suction/discharge tie-ins, and other minor modifications at the existing L.L. Tonkin Compressor Station in Doddridge County;
- a new Measurement and Regulation Station at Dominion's existing Cornwell Compressor Station in Kanawha County; and
- new gas coolers at Dominion's existing Mockingbird Compressor Station in Wetzel County.

The general location of the project facilities is shown in appendix 1.¹

Land Requirements for Construction

The total land requirement to construct the project is approximately 45.86 acres, of which 1.97 acres would be permanently altered and converted to commercial/industrial land use. Upon completion of the project, the remaining land used for temporary workspace would be re-graded, stabilized and re-vegetated, and allowed to revert to pre-construction conditions.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and
