[Docket No. 40-8903]

**Notice of Receipt of License Amendment Request From the Homestake Mining Company To Request an Extension of Reclamation Milestones for Its Grants, New Mexico Facility, and Opportunity To Request a Hearing**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of consideration of license and opportunity to request a hearing.

**DATES:** A request for a hearing must be filed within 30 days of the publication of this **Federal Register** notice.

**FOR FURTHER INFORMATION CONTACT:** William von Till, Fuel Cycle Facilities Branch, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Telephone: (301) 415-6251; Fax: (301) 415-5955; and/or by email: [rwv@nrc.gov](mailto:rwv@nrc.gov).

**SUPPLEMENTARY INFORMATION:****I. Introduction**

The U. S. Nuclear Regulatory Commission (NRC) has received, by letters dated October 28, 2003 (ML033030501), and October 29, 2003 (ML033040196), a request from Homestake Mining Company (HMC) for approval of a license amendment to Materials License SUA-1471 to extend its reclamation milestones.

The Homestake facility is an inactive uranium recovery fuel cycle facility that is undergoing surface reclamation and groundwater remediation. Milestones for reclamation are outlined in the Homestake Source Material License SUA-1471 in condition 36A and B. Surface reclamation milestones are dependent on groundwater remediation at the site. Homestake proposes to extend the milestones due to active groundwater remediation activities. Groundwater remediation at the site is under the oversight of the NRC per Source Material License SUA-1471 (10 CFR part 40) and the U.S. Environmental Protection Agency (EPA) under the Comprehensive Environmental Response Compensation and Liability Act of 1980, as amended (CERCLA). A Memorandum of Understanding dated December 14, 1993, outlines the NRC and EPA roles in the clean-up of groundwater at the site. Surface reclamation activities are under the oversight of the NRC. HMC proposes to extend the reclamation milestones for the large tailings pile (LTP) and small tailings pile (STP) as follows:

LTP—Final radon barrier placement—top of pile from December 31, 2003, to December 31, 2012.

LTP—Erosion protection layer placement—top of pile from September 30, 2004, to September 30, 2013.

STP—Final radon barrier placement from December 31, 2012, to September 30, 2013.

STP—Erosion protection layer placement from September 30, 2013, to December 31, 2013.

Corrective Action Plan completion from May 1, 2010, to December 31, 2011.

The NRC staff will review HMC's request to extend reclamation milestones with 10 CFR part 40, using NUREG-1620 Rev. 1, "Standard Review Plan for the Review of a Reclamation Plan for Mill Tailings Sites Under Title II of the Uranium Mill Tailings Radiation Control Act of 1978" and other applicable agency regulations and guidance. If the NRC approves HMC's request, the approval will be documented in an amendment to HMC's license. The NRC staff will consult with the EPA since the proposed milestones included groundwater corrective action completion.
