National Institute on Aging; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute on Aging Special Emphasis Panel; Cardiac Rehabilitation in Older Adults.

Date: February 5, 2018.

Time: 1:00 p.m. to 4:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institute on Aging, Gateway Building, Suite 2C212, 7201 Wisconsin Avenue, Bethesda, MD 20892.

Contact Person: Anita H. Undale, Ph.D., MD, Scientific Review Branch, National Institute on Aging, Gateway Building, Suite 2W200, 7201 Wisconsin Avenue, Bethesda, MD 20892, 240-747-7825, anita.undale@nih.gov.

(Catalogue of Federal Domestic Assistance Program Nos. 93.866, Aging Research, National Institutes of Health, HHS)

Dated: December 18, 2017.

Melanie J. Pantoja,

Program Analyst, Office of Federal Advisory Committee Policy.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Conservation Order for Light Geese

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the U.S. Fish and Wildlife Service (Service, we), are proposing to renew an information collection with revisions.

DATES: Interested persons are invited to submit comments on or before January 22, 2018.

ADDRESSES: Send written comments on this information collection request (ICR) to the Office of Management and Budget's Desk Officer for the Department of the Interior by email at OIRA_Submission@omb.eop.gov; or via facsimile to (202) 395-5806. Please provide a copy of your comments to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS: BPHC, 5275 Leesburg Pike, Falls Church, VA 22041-3803 (mail); or by email to Info_Coll@fws.gov. Please reference OMB Control Number 1018-0103 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Madonna L. Baucum, Service Information Collection Clearance Officer, by email at Info_Coll@fws.gov, or by telephone at (703) 358-2503. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on July 3, 2017 (82 FR 30883). The following comments were received:

Comment 1: The Central Flyway Council commented that a single survey conducted by Service is the most appropriate and accurate method for annually monitoring the participation and harvest in the light goose conservation order. This approach has been used by the Service since 1960 to monitor waterfowl harvest nationally for regular hunting seasons.

Agency Response to Comment 1: With regard to the Central Flyway proposal to implement a single, uniform survey conducted by the Service, during discussions with Flyway Councils

regarding initiation of the conservation order in the late 1990s there were concerns about whether or not a national information collection should be developed for the conservation order. That approach was not pursued due to the need to develop a new Federal permit, which we continue to believe is not a feasible alternative at this time. It was decided that each State would conduct its own information collection. Although State harvest estimates may not be fully comparable due to differences in methodology, we believe that summation of such estimates is warranted for general monitoring purposes. Furthermore, our existing Harvest Information Program (HIP) is geared towards estimating harvest of birds during regular hunting seasons that end on or before March 10 each year. Many States hold their light goose conservation order (not a regular hunting season) after March 10. Therefore, if HIP was used to estimate light goose conservation order harvest, our annual HIP reports would be delayed and could affect the normal hunting regulations promulgation process. The Service can only require HIP registration for regular hunting seasons to develop a sampling frame. There is no current mechanism for the Service to require HIP registration for conservation order participants. Therefore, there no sampling frame exists from which to conduct a single, uniform Federal survey.

Comment 2: The commenter feels the Service has lied about increasing populations of light geese, promotes the killing of birds to increase hunting license sales, and only considers input from hunters and farmers.

Agency Response to Comment 2: Our long-term objectives continue to include providing opportunities to harvest portions of certain migratory game bird populations and to limit harvests to levels compatible with each population's ability to maintain healthy, viable numbers. Having taken into account the zones of temperature and the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory birds, we conclude that the hunting seasons are compatible with the current status of migratory bird populations and long-term population goals. With regard to the light goose conservation order, we documented the exponential growth of light goose populations when we authorized the conservation order (64 FR 7517 and 73 FR 65926). In those **Federal Register** notices, we also documented degradation to breeding habitats as a result of feeding actions of overabundant light goose populations.
