DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under The Resource Conservation and Recovery Act

On July 13, 2022, the Department of Justice filed a complaint and lodged a proposed consent decree with the United States District Court for the Middle District of Louisiana in the lawsuit entitled *United States of America and Louisiana Department of*

Environmental Quality v. PCS Nitrogen Fertilizer, L.P., Civil Action No. 3:22–cv–00468–SDD–RLB. If approved by the court, the consent decree would resolve the claims of the United States and the parallel claims of the Louisiana Department of Environmental Quality (LDEQ) against PCS Nitrogen Fertilizer, L.P., (PCS Nitrogen) for injunctive relief and civil penalties for alleged violations of the Resource Conservation and Recovery Act (RCRA) at PCS Nitrogen's former phosphoric acid fertilizer facility located in Geismar, Louisiana (Facility). PCS Nitrogen made phosphate and nitrogen fertilizer products (including sulfuric acid) at the Facility beginning in the 1960s, through processes that generated large quantities of acidic wastewater and a solid material called phosphogypsum. The phosphogypsum was deposited and remains in large piles that are over 200 feet high and cover an area greater than 100 acres. The Facility ceased fertilizer production operations in December 2018 but continues to conduct remediation and closure activities at its phosphogypsum stack system and surface impoundments.

The consent decree would require PCS Nitrogen to (1) implement compliance projects at the Facility; (2) make RCRA hazardous waste determinations and properly manage all solid wastes generated, including any solid wastes generated during cleaning of equipment and phosphogypsum stack closure; (3) construct a wastewater treatment plant, repair leaks in certain impoundments, properly segregate stormwater and wastewater, and properly manage railcar and other cleaning wastes; (4) comply with specified requirements for the ongoing closure and long-term care of the Facility; and (5) provide over \$84 million of financial assurance to cover the estimated cost of such obligations. In addition, the consent decree would require PCS Nitrogen to pay a civil penalty of \$1,510,023. In return for PCS Nitrogen's compliance with these requirements, the consent decree would resolve past RCRA violations at the Facility that the United States' and LDEQ's complaint alleges.

The publication of this notice opens a period for public comment on the consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States of America and Louisiana Department of Environmental Quality v. PCS Nitrogen Fertilizer, L.P.*, D.J. Ref. No. 90–7–1–08388/22. All comments must be submitted no later than forty-five (45) days after the publication date

SUPPLEMENTARY INFORMATION:

1. *Background:* On September 7, 2015, President Barack Obama signed Executive Order 13706, “Establishing Paid Sick Leave for Federal Contractors.” 80 FR 54697. The Executive Order established paid sick leave for Federal Contractors. Executive Order 13706 stated that the Federal Government’s procurement interests in efficiency and cost savings are promoted when the Federal Government contracts

with sources that ensure workers on those contracts can earn paid sick leave. The Executive Order therefore required parties who contract with the Federal Government to provide their employees with up to 7 days of paid sick time annually, including paid time allowing for family care. The Executive Order directed the Secretary to issue regulations by September 30, 2016, to the extent permitted by law and consistent with the requirements of 40 U.S.C. 121, to implement the Order’s requirements. The Final Rule established standards and procedures for implementing and enforcing the paid sick leave requirements of Executive Order 13706. 81 FR 67598.

Among other requirements, the regulations at 29 CFR 13 require employers subject to the Order to make and maintain records for notifications to employees on leave accrual and requests to use paid sick leave, dates and amounts of paid sick leave used, written responses to requests to use paid sick leave, records relating to certification and documentation where an employer requires this from an employee using at least 3 consecutive days of leave, tracking of or calculations related to an employee’s accrual or use of paid sick leave, the relevant covered contract, pay and benefits provided to an employee using leave, and any financial payment for unused sick leave made to an employee on separation from employment.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB under the PRA approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The Department obtains OMB approval for this information collection under Control Number 1235–0029.

OMB authorization for an ICR cannot be for more than 3 years without renewal, and the current approval for this collection will expire on January 31, 2023. The Department seeks to extend PRA authorization for this information collection for 3 more years, without any change to existing requirements. The Department notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review.
