

other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. Filing and Service of Documents: Any filing must (1) bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE" as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

p. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Dated: June 26, 2023.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP-2023-0154; FRL-10803-02-OCSPP]

FIFRA Scientific Advisory Panel (SAP); Examination of Microcosm/Mesocosm Studies for Evaluating the Effects of Atrazine on Aquatic Plant Communities; Notice of Availability, and Request for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA or "Agency") is announcing the availability of and soliciting public comment on the "Examination of Microcosm/Mesocosm Studies for Evaluating the Effects of Atrazine on Aquatic Plant Communities," that is being submitted to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel (SAP) for peer review. The document is available for public review and comment. The FIFRA SAP will consider and review the document at a 3-day virtual public meeting that was previously announced in the **Federal Register** of March 24, 2023. The virtual public meeting will be held on August 22-24, 2023, via a webcast platform such as "[Zoomgov.com](https://zoomgov.com)" and audio teleconference.

DATES: The following is a chronological listing of the dates for the specific activities that are described in more detail under **SUPPLEMENTARY INFORMATION**.

August 2, 2023—Deadline for providing written comments.

August 8, 2023—Deadline for submitting a request for special accommodations to allow EPA time to process the request before the meeting.

August 18, 2023—Deadline for registering to be listed on the meeting agenda to make oral comments during the virtual meeting.

August 22-24, 2023—Scheduled virtual public meeting of the FIFRA SAP.

August 24, 2023—Deadline for those not making oral comments to register to receive the links to observe the meeting.

ADDRESSES: *To comment:* Submit written comments, identified by docket identification (ID) number EPA-HQ-OPP-2023-0154, through <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not electronically submit any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Copyrighted material will not be posted without explicit permission from the copyright holder. Members of the public should also be aware that personal information included in any written comments may be posted on the internet at <https://www.regulations.gov>. Additional information on commenting or visiting the docket, along with more information about dockets generally, is available at <https://www.epa.gov/dockets>.

To register for the meeting: For information on how to register and access the virtual public meeting, please refer to the FIFRA SAP website at

<https://www.epa.gov/sap>. EPA intends to announce registration instructions on the FIFRA SAP website by early July 2023. You may also subscribe to the following listserve for alerts regarding this and other FIFRA SAP-related activities at https://public.govdelivery.com/accounts/USAEPAPPT/subscribe/new?topic_id=USAEPAPPT_101.T.

To request special accommodations: For information on access or services for individuals with disabilities, and to request accommodation for a disability, please contact the Designated Federal Official (DFO) listed under **FOR FURTHER INFORMATION CONTACT**.

FOR FURTHER INFORMATION CONTACT: The DFO, Tamue Gibson, Mission Support Division, Office of Program Support, Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency; telephone number: (202) 564-7642 or the main office number: (202) 564-8450; email address: gibson.tamue@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. What action is the Agency taking?

EPA is announcing the availability of and soliciting public comment on the document entitled "Examination of Microcosm/Mesocosm Studies for Evaluating the Effects of Atrazine on Aquatic Plant Communities," which is available in the docket. EPA is also announcing a 3-day virtual public meeting on August 22-24, 2023, for the FIFRA SAP to consider and review the Agency's examination. This August 2023 meeting was previously announced in the **Federal Register** of March 24, 2023 (88 FR 17843 (FRL-10803-01-OCSPP)). EPA will be soliciting comments from the FIFRA SAP on the Agency's examination related to 11 microcosm and mesocosm studies evaluating the toxicity of atrazine to the exposed aquatic plant communities.

This document provides instructions for accessing the materials provided to the FIFRA SAP, submitting written comments, and registering to provide oral comments and attend the virtual meeting.

B. What is the Agency's authority for taking this action?

The FIFRA SAP is a federal advisory committee established in 1975 under FIFRA, 7 U.S.C. 136 *et seq.*, to provide independent scientific advice to EPA on health and safety issues related to pesticides. The FIFRA SAP operates in accordance with the Federal Advisory Committee Act (FACA), 5 U.S.C. 10, and

supports activities under FIFRA, the Federal Food, Drug, and Cosmetic Act (FFDCA) and other applicable statutes.

C. Does this action apply to me?

This action is directed to the public in general. This action may be of interest to persons who are or may be required to conduct testing of chemical substances under the FFDCA and FIFRA. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

D. What should I consider as I submit my comments to EPA?

1. Submitting CBI.

Contact the DFO listed under **FOR FURTHER INFORMATION CONTACT** for instructions before submitting CBI or other sensitive information. Do not submit this information to EPA electronically (e.g., through <https://www.regulations.gov> or email). Clearly mark the part or all of the information that you claim to be CBI. For confidential information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. Tips for preparing your comments.

When preparing and submitting your comments, see the commenting tips at <https://www.epa.gov/dockets/commenting-epa-dockets>. See also the instructions in Unit III.

II. Background

A. What is the purpose of the FIFRA SAP?

The FIFRA SAP serves as one of the primary scientific peer review mechanisms of EPA's Office of Chemical Safety and Pollution Prevention (OCSPP) and is structured to provide independent scientific advice, information, and recommendations to the EPA Administrator on pesticides and pesticide-related issues as to the impact of regulatory actions on human health and the environment. The FIFRA SAP is composed of a permanent panel consisting of seven members who are appointed by the EPA Administrator from nominees provided by the National

Institutes of Health and the National Science Foundation. FIFRA established a Science Review Board consisting of at least 60 scientists who are available to the FIFRA SAP on an *ad hoc* basis to assist in reviews conducted by the FIFRA SAP. As a scientific peer review mechanism, the FIFRA SAP provides comments, evaluations, and recommendations to improve the effectiveness and quality of analyses made by Agency scientists. Members of the FIFRA SAP are scientists who have sufficient professional qualifications, including training and experience, to provide expert advice and recommendations to the Agency.

B. Why did EPA develop this document?

EPA participated in several FIFRA SAP meetings related to atrazine's impact on the environment (e.g., 2003, 2007, 2009, 2012). In June 2012, the EPA presented the "Problem Formulation for the Environmental Fate and Ecological Risk Assessment for Atrazine" to the FIFRA SAP. That problem formulation provided an overview of atrazine use, exposure, and toxicity for assessing the ecological risk from atrazine use. One of the major considerations for the 2012 FIFRA SAP was the process that the EPA used to estimate an aquatic plant community-based concentration equivalent-level of concern (CE-LOC). The CE-LOC is a 60-day average concentration of atrazine that, when exceeded, presents a greater than 50 percent chance of negatively affecting the productivity, structure, and/or function of an aquatic plant community.

Cosm studies examining the toxicity of atrazine to aquatic plant communities are a significant part of the process to estimate the CE-LOC. Accordingly, from 2002 to 2016, the EPA considered over 70 cosm studies obtained from the open literature or submitted to the EPA. The 2012 FIFRA SAP identified 11 specific cosm studies from that dataset (Table 1, page 42–43 of the meeting report) as warranting further review (in terms of their inclusion/exclusion in the analysis or the effect/no effect determinations for specific measured endpoints) because of concerns about study design or performance flaws, as well as the interpretation of results.

In response to the 2012 FIFRA SAP, the EPA re-evaluated the 11 specific cosm studies identified by the FIFRA SAP and presented this re-evaluation in the 2013 "Addendum to the Problem Formulation for the Ecological Risk Assessment to be Conducted for the Registration Review of Atrazine" and the 2016 "Refined Ecological Risk Assessment for Atrazine." In conducting

this 2013 and 2016 re-evaluation, EPA considered comments from the 2012 FIFRA SAP and the public. This re-evaluation did not result in a change in the Agency's understanding or interpretation of those 11 studies. After the issuance of the 2016 ecological risk assessment and the 2022 "Proposed Revisions to the Atrazine Interim Registration Review Decision," the EPA received additional public comments about the 11 studies, including a reminder that the Agency had stated in 2016 its intent to convene a FIFRA SAP meeting, along with renewed requests to convene a FIFRA SAP meeting, regarding the studies.

The EPA is returning to the FIFRA SAP to seek feedback on the outcome of the EPA's 2023 evaluation regarding the inclusion of the 11 studies, and if appropriate, effect/no effect determinations for specific measured endpoints from the studies that were identified by the 2012 FIFRA SAP.

III. Virtual Public Meeting of the FIFRA SAP

A. How can I access the documents submitted for review to the FIFRA SAP?

These documents, including the reevaluation document mentioned above and all background documents, related supporting materials, and draft charge questions provided to the FIFRA SAP are available in the docket at <https://www.regulations.gov> (docket ID No. EPA-HQ-OPP-2023-0154) and the FIFRA SAP website at <https://www.epa.gov/sap>. In addition, as additional background materials become available and are provided to the FIFRA SAP, EPA will include those additional background documents (e.g., FIFRA SAP members and consultants participating in the meeting and the meeting agenda) in the docket and accessible through the FIFRA SAP website.

After the public meeting, the FIFRA SAP will prepare meeting minutes and a final report document summarizing its recommendations to the EPA. This document will also be posted on in the docket and available at [regulations.gov](https://www.regulations.gov) and the FIFRA SAP website.

B. How can I provide comments for the FIFRA SAP's consideration?

To ensure proper receipt of comments it is imperative that you identify docket ID No. EPA-HQ-OPP-2023-0154 in the subject line on the first page of your comments and follow the instructions in this unit.

1. Written comments.

The Agency encourages written comments for this meeting be submitted by the deadlines set in the **DATES** section

of this document and following the instructions in this document.

2. Oral comments.

The Agency encourages each individual or group wishing to make brief oral comments to the FIFRA SAP during the peer review virtual public meeting to follow the registration instructions that will be announced on the FIFRA SAP website by early July 2023. Oral comments before the FIFRA SAP during the peer review virtual public meeting are limited to five minutes. In addition, each speaker should submit a written copy of their oral comments and any supporting materials (e.g., presentation slides) to the DFO prior to the meeting for distribution to the FIFRA SAP by the DFO.

C. How can I participate in the virtual public meeting?

The virtual public meeting will be held via a webcast platform such as "Zoomgov.com" and audio teleconference. You must register online to receive the webcast meeting link and audio teleconference information. Please follow the registration instructions that will be announced on the FIFRA SAP website.

Authority: 5 U.S.C. 10; 7 U.S.C. 136 *et seq.*; 21 U.S.C. 301 *et seq.*

Dated: June 27, 2023.

Michal Freedhoff,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-10912-01-ORD]

Ambient Air Monitoring Equivalent and Equivalent Methods; Designation of One New Equivalent Method

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of the designation of a new equivalent method for monitoring ambient air quality.

SUMMARY: Notice is hereby given that the Environmental Protection Agency (EPA) has designated one new equivalent method for measuring concentrations of PM₁₀ in ambient air.

FOR FURTHER INFORMATION CONTACT: Robert Vanderpool, Air Methods and Characterization Division (MD-D205-03), Center for Environmental Measurements and Modeling, U.S. EPA, Research Triangle Park, North Carolina 27711. Phone: 919-541-7877. Email: Vanderpool.Robert@epa.gov.

SUPPLEMENTARY INFORMATION: In accordance with regulations at 40 CFR part 53, the EPA evaluates various methods for monitoring the concentrations of those ambient air pollutants for which EPA has established National Ambient Air Quality Standards (NAAQS) as set forth in 40 CFR part 50. Monitoring methods that are determined to meet specific requirements for adequacy are designated by the EPA as either equivalent or equivalent methods (as applicable), thereby permitting their use under 40 CFR part 58 by States and other agencies for determining compliance with the NAAQS. A list of all equivalent or equivalent methods that have been previously designated by EPA may be found at <https://www.epa.gov/ttn/amtic/criteria.html>.

The EPA hereby announces the designation of one new equivalent method for measuring concentrations of PM₁₀ in ambient air. This designation is made under the provisions of 40 CFR part 53, as amended on October 26, 2015 (80 FR 65291-65468). The new equivalent method for PM₁₀ is an automated method (monitor) utilizing the measurement principle based on inertial separation of the PM₁₀ size range with filter sample collection followed by analysis by beta attenuation. This newly designated equivalent method is identified as follows:

EQPM-0423-260, "Thermo Scientific Model 5030iQ SHARP Monitor" operated at a flow rate of 16.67 liters per minute for 24-hour average measurements configured for PM₁₀ measurements with a louvered PM₁₀ size selective inlet as specified in 40 CFR 50 Appendix L, Figs. L-2 through L-19, inlet connector, and operational calibration and servicing as outlined in the Model 5030iQ SHARP instructional manual. Model 5030iQ instrument firmware version 01.0.09 or later.

This application for an equivalent method determination for this PM₁₀ method was received by the Office of Research and Development on February 22, 2023. This monitor is commercially available from the applicant, Thermo Fisher Scientific, Air Quality Instruments, Environmental Instruments Division, 27 Forge Parkway, Franklin, MA 02038.

A representative test analyzer was tested in accordance with the applicable test procedures specified in 40 CFR part 53, as amended on October 26, 2015. After reviewing the results of those tests and other information submitted by the applicant, EPA has determined, in accordance with 40 CFR part 53, that

this method should be designated as an equivalent method.

As a designated equivalent method, this method is acceptable for use by states and other air monitoring agencies under the requirements of 40 CFR part 58, Ambient Air Quality Surveillance. For such purposes, this method must be used in strict accordance with the operation or instruction manual associated with the method and subject to any specifications and limitations (e.g., configuration or operational settings) specified in the designated method description (see the identification of the method above).

Use of the method also should be in general accordance with the guidance and recommendations of applicable sections of the "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume I," EPA/600/R-94/038a and "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume II, Ambient Air Quality Monitoring Program," EPA-454/B-13-003, (both available at <https://www.epa.gov/ttn/amtic/qalist.html>). Provisions concerning modification of such methods by users are specified under section 2.8 (Modifications of Methods by Users) of appendix C to 40 CFR part 58.

Consistent or repeated noncompliance with any of these conditions should be reported to: Director, Air Methods and Characterization Division (MD-D205-03), Center for Environmental Measurements and Modeling, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of this equivalent method is intended to assist the States in establishing and operating their air quality surveillance systems under 40 CFR part 58. Questions concerning the commercial availability or technical aspects of the method should be directed to the applicant.

Alice Gilliland,

Acting Director, Center for Environmental Measurements and Modeling.
