Once in the system, select "search," then key in the docket ID number identified in this document.

What information is EPA particularly interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- (iii) enhance the quality, utility, and clarity of the information to be collected; and

- (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of

information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What should I consider when I prepare my comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under DATES.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name date, and Federal Register citation.

What information collection activity or ICR does this apply to?

Docket ID No. EPA-HQ-OAR-2004-0077.

Affected entities: Entities potentially affected by this action are manufacturers, importers, formulators and processors of substitutes for ozone-depleting substances.

Title: Significant New Alternatives Policy (SNAP) Program Final Rulemaking Under Title VI of the Clean Air Act Amendments of 1990.

ICR numbers: EPA ICR No. 1596.08, OMB Control No. 2006-0226.

ICR status: This ICR is currently scheduled to expire on June 30, 2011. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the Federal Register when approved, are listed in 40 CFR part 9, and are displayed either by publication in the Federal Register or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Information collected under this rulemaking is necessary to implement the requirements of the Significant New Alternatives Policy (SNAP) program for evaluating and regulating substitutes for ozone-depleting chemicals being phased out under the stratospheric ozone protection provisions of the Clean Air Act (CAA) and globally under the *Montreal Protocol on Substances That Deplete the Ozone Layer*. Under CAA Section 612, EPA is authorized to identify and restrict the use of substitutes for class I and class II ozone-depleting substances where EPA determines other alternatives exist that reduce overall risk to human health and the environment. The SNAP program, based on information collected from the manufacturers, formulators, and/or sellers of such substitutes, identifies acceptable substitutes. Responses to the collection of information are mandatory under Section 612 for anyone who sells or, in certain cases, uses substitutes for an ozone-depleting substance after April 18, 1994, the effective date of the final rule. Measures to protect confidentiality of information collected under the SNAP program are based on EPA's confidentiality regulations (40 CFR 2.201 *et seq.*, or Subpart B). Submitters may designate all or portions of their forms or petitions as confidential. EPA requires the submitters to substantiate their claim of confidentiality. Under CAA Section 114(c), emissions information may not be claimed as confidential.

To develop the lists of acceptable and unacceptable substitutes, the Agency must assess and compare "overall risks to human health and the environment" posed by use of substitutes in the context of particular applications. EPA requires submission of information covering a wide range of health and environmental factors. These include intrinsic properties such as physical and chemical information, ozone depleting potential, global warming potential, toxicity, and flammability, and use-specific data such as substitute applications, process description, environmental release data, exposure data during use of a substitute, environmental fate and transport, and cost information. Once a completed submission has been received, a 90 day review period under the SNAP program will commence. Any substitute which is a new chemical must also be submitted to the Agency under the Premanufacture Notice program under the Toxic Substances Control Act (TSCA). Alternatives that will be used as sterilants must be filed jointly with

EPA's Office of Pesticide Programs and with SNAP.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 30 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 221.

Frequency of response: Annual.

Estimated total annual burden hours: 6,517 hours.

Estimated total annual costs: \$465,450. This includes an estimated burden cost of \$443,170 in labor costs, \$22,070 in capital costs, and \$210 in maintenance and operational costs.

Are there changes in the estimates from the last approval?

There is a decrease of 1,687 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. The development of new substitutes caused the number of persons filing a SNAP Information Notice or TSCA/SNAP addendum to increase slightly, but also resulted in fewer respondents keeping records for alternatives that are subject to narrowed use limits. In addition, respondents filing a SNAP Information Notice reported a decrease in total annual burden of hours when collecting data to complete the form and when responding to requests for additional information. This decrease may be attributable to increased respondent familiarity with EPA's forms, more examples in the public record for respondents to research and use in preparing responses, and general increased availability of computer software and information via the Internet.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: January 24, 2011.

Acting Director, Office of Atmospheric Programs.
