SUPPLEMENTARY INFORMATION:**I. Discussion**

The monitoring plan describes the NRC staff’s planned activities in carrying out its responsibilities for monitoring the DOE disposal actions at the Savannah River Site (SRS) Saltstone Disposal Facility (SDF) in accordance with the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (NDAA). In 2005, the DOE provided the Draft Basis for Waste Determination for the SRS SDF to the NRC, as part of the DOE’s consultation with the NRC required by NDAA Section 3116(a). After its review, the NRC issued a Technical Evaluation Report (TER) for the SRS SDF in December 2005. In the 2005 TER, the NRC staff documented the results of its review and concluded that there was reasonable assurance that the applicable criteria of NDAA could be met by the DOE, provided certain assumptions made in the DOE analyses were verified via monitoring. Taking into consideration the assumptions, conclusions, and recommendations in both the 2005 NRC TER and the 2006 DOE Final Basis for Waste Determination for the SRS SDF, the Secretary of Energy issued the SRS SDF Waste Determination in January 2006 that stated SRS treated salt waste is not high-level waste and may be disposed of at the SRS SDF. After issuance of the 2006 Secretary of Energy Waste Determination for the SRS SDF document, the NRC began monitoring the DOE disposal actions at the SRS SDF under NDAA Section 3116(b) in coordination with the NDAA-Covered State of South Carolina. In 2007, the NRC issued Revision 0 of the SRS SDF Monitoring Plan based on both the 2005 NRC TER and the 2006 DOE Final Basis for Waste Determination documents. In 2009, the DOE provided a revised SRS SDF Performance Assessment to the NRC. After its review of the revised DOE Performance Assessment, the NRC issued Revision 1 of the TER for the SRS SDF in April 2012. In the 2012 TER, the NRC staff documented the results of its review and concluded that it did not have reasonable assurance that salt waste disposal at the SDF met the Performance Objectives in part 61, subpart C, of title 10 of the *Code of Federal Regulations* (10 CFR), specifically 10 CFR 61.41 “Protection of the General Population from Releases of Radioactivity.” In 2013, the NRC issued Revision 1 of the SRS SDF Monitoring
