8. *The estimated number of annual respondents:* 43.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 780.

10. *Abstract:* The accident tolerant fuel (ATF) program is a joint effort between the U.S. nuclear industry and the U.S. Department of Energy to design and pursue approval of various fuel types with enhanced accident tolerance. The ATF program includes development of technologies that would extend fuel burnup and enrichment limits beyond currently authorized levels. In order to deploy these new technologies, the industry will need to seek authorization for various activities throughout the fuel cycle, from fuel fabrication, transportation, and storage to installation and utilization in a reactor. In order to support the timely processing of licensing activities needed to support the deployment of these new technologies, the NRC is seeking scheduling information for licensing submittals from all respondents. This information will allow the NRC to better allocate its resources to support the activities associated with licensing these technologies while being better able to meet the industry's desired timeline.

**II. Background**

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, "Specific Domestic Licenses to Manufacture or Transfer Certain Items Containing Byproduct Material." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on April 4, 2022 (87 FR 19535).

1. **The title of the information collection:** "Specific Domestic Licenses to Manufacture or Transfer Certain Items Containing Byproduct Material."

2. **OMB approval number:** 3150–0001.

3. **Type of submission:** Extension.

4. **The form number, if applicable:** NRC Form 653, 653A, 653B.

5. **How often the collection is required or requested:** There is a one-time submittal of information to receive a certificate of registration for a sealed source and/or device. Certificates of registration for sealed sources and/or devices can be amended at any time. In addition, licensee recordkeeping must be performed on an on-going basis, and reporting of transfer of byproduct material must be reported every calendar year, and in some cases, every calendar quarter.

6. **Who will be required or asked to respond:** All specific licensees who manufacture or initially transfer items containing byproduct material for sale or distribution to general licensees, or persons exempt from licensing, medical use product distributors to specific licensees, and those requesting a certificate of registration for a sealed source and/or device.

7. **The estimated number of annual responses:** 3,038 [2,285 reporting + 349 recordkeepers + 404 third-party recordkeepers].

8. **The estimated number of annual respondents:** 662 (156 NRC licenses, registration certificate holder + 506 Agreement States licensees and registration certificate holders).

9. **The estimated number of hours needed annually to comply with the information collection requirement or request:** 109,510 (15,601 reporting + 1,122 recordkeeping + 92,787 third-party).

10. **Abstract:** Part 32 of title 10 of the *Code of Federal Regulations* (10 CFR), "Specific Domestic Licenses to Manufacture or Transfer Certain Items Containing Byproduct Material," establishes requirements for specific licenses for the introduction of byproduct material into products or materials and transfer of the products or materials to general licensees, or persons exempt from licensing, medical use product distributors to specific licensees, and those requesting a certificate of registration for a sealed source and/or device. It also prescribes requirements governing holders of the specific licenses. Some of the requirements are for information which must be submitted in an application for a certificate of registration for a sealed source and/or device, records which must be kept, reports which must be submitted, and information which must be forwarded to general licensees and persons exempt from licensing. As mentioned, 10 CFR part 32 also prescribes requirements for the issuance of certificates of registration (concerning radiation safety information about a product) to manufacturers or initial transferors of sealed sources and devices. Submission or retention of the information is mandatory for persons subject to the 10 CFR part 32 requirements. The information is used by the NRC to make licensing and other regulatory determinations concerning the use of radioactive byproduct material in products and devices.
