

result in cost shifts.”¹¹ On what basis does MISO make that claim? Has MISO performed any studies to draw that conclusion? If so, please explain the results of the study.

15. Could MISO include voltage management as a constraint in an SCED/SCUC model that would allow for cost allocation in the same way that the constraint management charge is derived?

16. Please explain any objections MISO may have with regard to allowing Local Balancing Authority (LBA) Area participation in studies that result in costs being allocated to those LBAs.

17. Referencing the transmittal letter in Docket No. ER12-678-000 at 11, indicate objective criteria MISO would use that would form the basis for a broader allocation beyond the LBA Area.

18. Referencing the discussion in the transmittal letter in Docket No. ER12-678-000 at 15 of “Commercially Significant” voltage and local reliability issues, explain all the criteria that MISO will use to determine if a VLR is commercially significant.

Session 3: Mitigation (Docket No. ER12-679-000) (2 p.m.–4 p.m.)

19. The IMM’s testimony describes voltage support commitments and reasons for those commitments, stating that “local reliability and voltage support needs generally pertain to a very limited geographic area where the resources available to satisfy the reliability needs are owned by a very small number of suppliers, often only a single supplier.”¹² How will the IMM determine which units are VLR commitments? How will the IMM monitor for units committed for VLR and for economics (and which mitigation thresholds will apply)?

20. To what extent do MISO and/or the IMM expect VLR mitigation to stem increasing Revenue Sufficiency Guarantee costs?

21. Explain the interplay between VLR mitigation and existing mitigation measures within Broad Constrained Areas (BCAs) and Narrow Constrained Areas (NCAs). Could a resource be mitigated under both sets of mitigation thresholds? If so, under what circumstances?

22. Please describe how MISO will determine reference levels for units committed for VLR. Given the specific market power concerns associated with VLRs, is it appropriate to use historical

offer information to determine their initial reference levels?

Conference Conclusion: Next Steps (4 p.m.–4:30 p.m.)

Staff will conclude the conference and outline next steps.
