10. *Abstract:* 10 CFR part 52 establishes requirements for the granting of early site permits, certifications of standard nuclear power plant designs, and licenses which combine in a single license a construction permit, and an operating license with conditions (combined licenses), manufacturing licenses, duplicate plant licenses, standard design approvals, and pre-application reviews of site suitability issues. Part 52 also establishes

requirements for renewal of these approvals, permits, certifications, and licenses; amendments to them; exemptions from certifications; and variances from early site permits.

NRC uses the information collected to assess the adequacy and suitability of an applicant's site, plant design, construction, training and experience, and plans and procedures for the protection of public health and safety. The NRC review of such information and the findings derived from that information form the basis of NRC decisions and actions concerning the issuance, modification, or revocation of site permits, design certifications, and combined licenses for nuclear power plants.
