

Abstract: Section 4d(c) of the Commodity Exchange Act (CEA), 7 U.S.C. 6d(c), requires the CFTC to consult with the SEC and issue such rules, regulations, or orders as are necessary to avoid duplicative or conflicting regulations applicable to firms that are fully registered with the SEC as brokers or dealers (broker-dealers) and the CFTC as futures commission merchants (FCMs) involving provisions of the CEA that pertain to the treatment of customer funds. The CFTC, jointly with the SEC, issued regulations requiring such dually-registered firms to make choices as to how its customers' transactions in security futures products (SFP) will be treated, either as securities transactions held in a securities account or as futures transactions held in a futures account. How an account is treated is important in the unlikely event of the insolvency of the firm. Securities accounts receive insurance protection under provisions of the Securities Investor Protection Act. By contrast, futures accounts are subject to the protections provided by the segregations requirements of the CEA.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the CFTC's regulations were published on December 30, 1981. See 46 FR 63035 (Dec. 30, 1981). The OMB control number for the CFTC's rules relating to security futures products was published on August 23, 2001. See 66 FR 44490 (Aug. 23, 2001).

The Commission would like to solicit comments to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have a practical use;
- Evaluate the accuracy of the Commission's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, usefulness, and clarity of the information to be collected; and
- Minimize the burden of collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.

Burden Statement: The respondent burden for this collection is estimated to average .59 hours per response. These estimates include the time needed to

review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: 144.

Estimated number of responses: 2,739.

Estimated total annual burden on respondents: 1,620.48 hours.

Frequency of collection: On occasion.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; and transmit or otherwise disclose the information.

Dated: August 15, 2007.

David A. Stawick,

Secretary of the Commission.

SUPPLEMENTARY INFORMATION:

A. Purpose

The National Defense Authorization Act for Fiscal Year 2006 (P. L. 109-360) requires OFPP, in consultation with the Federal Acquisition Regulatory Council, to review the use of online procurement services, such as reverse auction services, and identify types of commercial item procurements that are suitable for the use of such services; and features that should be provided by online procurement services that are used by Federal agencies. To conduct this review, a survey will be issued to the Government and industry buying activities and to reverse auction service

providers. The information collected through the surveys will be used to determine how the Government buying activities can most effectively use reverse auctions as a tool to support Government requiring activities and ensure that the U.S. taxpayer is best served. To view the two draft surveys—entitled, Online Procurement Services—Government and Industry Outreach Feedback and Online Procurement Services—Reverse Auction Service Providers Outreach Feedback, visit <http://www.acquisition.gov>.

Title: Online Procurement Services—Government and Industry Outreach Feedback; and Online Procurement Services—Reverse Auction Service Providers Outreach Feedback.

OMB Number: Not Yet Assigned.

Expiration Date: Not yet determined.

Type of Request: New collection of information.

Abstract: The purpose of these two one-time surveys are to determine how Government buying activities can most effectively use reverse auctions as a tool to support Government requiring activities and to ensure the U.S. taxpayer is best served.

Affected Public: Two respondent groups are identified and will receive similar surveys on Online Procurement Services: Government and industry buying activities; and reverse auction service providers. However, for the purposes of this collection we are counting the industry buying activities and reverse auction service providers.

B. Annual Reporting Burden

Respondents: 580 (not to exceed 1000).

Responses Per Respondent: 1.

Annual Responses: 580 (not to exceed 1000).

Hours Per Response: 0.50.

Total Burden Hours: 290.

Estimated Number of Respondents: approximately 580 and not expected to exceed 1000. The estimated number of industry respondents to the Government and Industry Buying Activities Survey is 550. The estimated number of industry respondents to the Reverse Auction Survey is 30 based on the Government's latest market research. Estimated Number of Responses per Respondent: 1 per company. The number of responses per respondent is one for each of the two surveys. Each respondent will only be required to complete one survey once. Estimated Total Annual Responses: approximately 580 and not expected to exceed 1000 (580 x 1). Estimated Time per Response: 30 minutes (0.50 hours). The estimated average time for industry to respond to Government and Industry Buying Activity Survey is approximately 15 minutes (0.25 hours), based on a pre-test of the draft instrument by Government

employees. The data collection instrument for the Reverse Auction Service Providers Survey was pre-tested on a support contractor, a related business sector. The Reverse Auction Service Providers Survey instrument is similar to the Government and Industry Buying Activity Survey; therefore, the pre-test results for the Government and Industry Buying Activity Survey are used to estimate average response time for the Reverse Auction Service Providers Survey, which is 15 minutes (0.25 hours). Estimated Total Annual Burden on Respondents: 290 hours (580 x 0.50).

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.
