SUPPLEMENTARY INFORMATION:**I. Abstract**

This request is for renewal of a currently approved information collection.

All non-commercial participants (including vessel owners, operators, and crew) in the boat-based bottomfish fishery in the main Hawaiian Islands are required to obtain a federal bottomfish permit, pursuant to 50 CFR 665. This collection of information is needed for permit issuance, to identify actual or potential participants in the fishery, determine qualifications for permits, and to help measure the impacts of management controls on the participants in the fishery. The permit program is also an effective tool in the enforcement of fishery regulations and serves as a link between the National Marine Fisheries Service (NMFS) and fishermen.

All vessel owners or operators in this fishery are required to submit a completed logbook form at the completion of each fishing trip. These logbook reporting sheets document the

species and amount of species caught during the trip. The reporting requirements are crucial to ensure that NMFS and the Western Pacific Fishery Management Council (Council) will be able to monitor the fishery and have fishery-dependent information to develop an estimate of an Annual Catch Limit (annual Total Allowable Catch) for the fishery, evaluate the effectiveness of management measures, determine whether changes in fishery management programs are necessary, and estimate the impacts and implications of alternative management measures.

II. Method of Collection

Permit information is collected via permit applications. Permits are valid for one calendar year and may be renewed annually. Completed logbook forms are required to be submitted to NMFS by vessel owners or operators within 72 hours of the end of each fishing trip.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.
