**Abstract:** Respondents are owners or operators of aerospace manufacturing and rework operations. Respondents must submit one-time reports of initial performance tests and semiannual reports of noncompliance. Record keeping and parameters related to air pollution control technologies is required. The reports and records will be used to demonstrate compliance with the standards.

**Form Numbers:** None.

**Respondents/affected entities:** Aerospace manufacturing and rework facilities.

**Respondent’s obligation to respond:** Mandatory (40 CFR part 63, subpart GG).

**Estimated number of respondents:** 136 (total).

**Frequency of response:** Initially, semiannually, and occasionally.

**Total estimated burden:** 140,936 hours (per year). “Burden” is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$13,921,987 (per year), includes \$136,000 annualized capital or operation & maintenance costs.

**Changes in the Estimates:** There is an adjustment decrease in respondent burden hours and an increase in Agency

hours in this ICR compared to the previous ICR; however, this is not due to any program changes. The changes are a result of several corrections; specifically, this ICR: (1) Corrects discrepancies in the number of compliance status reports and SSM reports between the respondent and the Agency burden tables; (2) corrects rounding errors in respondent burden Table 1b in the previous ICR; and (3) changes the frequency of reviewing semiannual reports from one to two for the Agency. This ICR also uses updated labor rates in calculating all costs, which results in an overall increase in burden costs.

Furthermore, this ICR corrects the number of responses to be consistent with the burden calculations. This results in an adjustment increase in the total number of responses.

### Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHP for Area Sources: Acrylic and Modacrylic Fibers Production, Carbon Black Production, Chemical Manufacturing: Chromium Compounds, Flexible Polyurethane Foam Production and Fabrication, Lead Acid Battery Manufacturing, and Wood Preserving (Renewal)

**Abstract:** EPA established national emission standards for hazardous air pollutants (NESHP) for seven area source categories. The requirements for

two area source categories (Flexible Polyurethane Foam Production and Flexible Polyurethane Foam Fabrication) are combined in one subpart. The standards include emissions limitations and work practice requirements for new and existing plants based on the generally available control technology or management practices (GACT) for each area source category. Potential respondents include 1 existing acrylic and modacrylic production facility, 2 existing chromium product manufacturing facilities, 500 existing flexible polyurethane foam production and fabrication facilities, 60 existing lead acid battery manufacturing facilities, and 393 existing wood preserving facilities. The total annual responses attributable to this ICR for existing sources are two one-time notifications; some existing facilities may be required to prepare a startup, shutdown, and malfunction plan, perform additional monitoring and recordkeeping, and/or conduct an initial performance test. The owner or operator of a new area source would be required to comply with all requirements of the General Provisions (40 CFR part 63, subpart A). No burden estimates are provided for new area sources because no new facilities are expected during the next 3 years.

**Form Numbers:** None.

**Respondents/affected entities:** Acrylic and modacrylic fibers production, carbon black production, chemical manufacturing: Chromium compounds, flexible polyurethane foam production and fabrication, lead acid battery manufacturing, and wood preserving facilities

**Respondent's obligation to respond:** Mandatory (40 CFR part 63, subparts LLLLLL, MMMMMM, NNNNNN, OOOOOO, PPPPPP, and QQQQQQ)

**Estimated number of respondents:** 956 (total).

**Frequency of response:** Initially, semiannually, and occasionally.

**Total estimated burden:** 3,217 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$314,627 (per year), which includes no annualized capital or operation & maintenance costs.

**Changes in the Estimates:** There is an overall decrease in the respondent and Agency burden in this ICR compared to the most-recently approved ICR. The decrease in burden and cost estimates occurred because the standard has been in effect for more than three years and the requirements are different during initial compliance as compared to ongoing compliance. The previous ICR reflected those burdens and costs
