

the proposed action does not involve any construction impact.

(v) There is no significant increase in the potential for or consequences from radiological accidents; and

The proposed action involves only a schedule change which is administrative in nature, and does not impact the probability or consequences of accidents.

(vi) The requirements from which an exemption is sought involve:

(B) Reporting requirements;

The exemption request involves submitting an updated FSAR by EOI and

(G) Scheduling requirements;

The proposed exemption relates to the schedule for submitting FSAR updates to the NRC.

4.0 Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a)(1) and (2), the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also special circumstances are present. Therefore, the Commission hereby grants EOI the exemption from the requirements of 10 CFR 50.71(e)(3)(iii) pertaining to the GGNS3 COL application to allow submittal of the next FSAR update the earlier of the resumption of the COL application review or December 31, 2015.

Pursuant to 10 CFR 51.22, the Commission has determined that the exemption request meets the applicable categorical exclusion criteria set forth in 10 CFR 51.22(c)(25), and the granting of this exemption will not have a significant effect on the quality of the human environment.

This exemption is effective upon issuance.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with § 51.118 of Title 10 of the *Code of Federal Regulations*, the NRC is making available final Supplement 50 to the GEIS regarding the renewal of Entergy operating license NPF-29 for an additional 20 years of operation for GGNS. Draft Supplement 50 to the GEIS was noticed by the NRC in the **Federal Register** on December 12, 2013 (78 FR 75579), and noticed by the Environmental Protection Agency on December 20, 2013 (78 FR 77121). The public comment period on draft Supplement 50 to the GEIS ended on February 11, 2014, and the comments received are addressed in final Supplement 50 to the GEIS.

II. Discussion

As discussed in Section 9.4 of the final Supplement 50 to the GEIS, the NRC staff determined that the adverse environmental impacts of license renewal for GGNS are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) The analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by Entergy; (3) consultation with Federal, State, local, and Tribal agencies; (4) the NRC staff's independent environmental review; and (5) consideration of public comments received during the scoping process and on the Draft Supplemental Environmental Impact Statement.
